INSTRUMENTS AND EXPERIMENTAL TECHNIQUES
Volume 22, Numbers 1-6, 1979
(A translation of Pribory i Tekhnika Éksperimenta)

Volume 22, Number 1, Part 1 January-February, 1979

	Engl./Russ.	
Scintillation Pickups with Plateau in the Counting Characteristic (Review) — Yu. I. Sokolov	1	7
NUCLEAR EXPERIMENTAL TECHNIQUES		
Modernization of the 120-cm Cyclotron — L. A. Sarkisyan, E. F. Kir'yanov, and Yu. A. Vorob'ev	15	19
System for Measurement of the Parameters of the Electron Ring of a Heavy-Ion Accelerator by the Synchrotron Radiation — T. V. Bespalova, I. A. Golutvin, N. I. Zamyatin, Yu. T. Kiryushin, N. M. Lustov, A. A. Mal'tsev, A. A. Popov, V. P. Sarantsev, V. A. Svidirov, D. A. Smolin, V. S. Khabarov, and Yu. A. Yatsunenko	18	22
Stabilizing Resonator of High-Power Klystron Self-Oscillator — V. I. Beloglazov and L. N. Sdobnova	23	26
Channel for Electronic Cooling of a Proton Beam for Injection into a Linear Accelerator — V. A. Batalin	25	28
Resonator Sensor for the Parameters of Charged-Particle Beams — M. A. Voevodin, A. D. Kovalenko, P. P. Pavlov, and V. A. Popov	29	32
Iron-Free Ribbon-Type Multipole Magnetic Lens — K. K. Onosovskii and S. V. Skachkov	32	34
Instrument Function of Cylindrical Energy Analyzer in Raster Auger Spectroscopy — V. A. Gorelik, Yu. P. Mashinskii, T. M. Pikovskaya, O. D. Protopopov	36	38
Shielding of Analyzer Crystal of Neutron Spectrometer — V. S. Bondarevskii, M. G. Zemlyanov, V. P. Moryakov, I. V. Naumov, P. P. Parshin, and A. Yu. Rumyantsev	40	41
Instrument for the Investigation of the Surface Structure of Crystals by the Electron Diffraction Method — L. A. Titov, S. S. Romanov, and G. K. Zyryanov	42	43
Electron-Energy Analyzer Based on the Retarding-Field Method for Use in a Gas Medium — E. D. Mishchenko and A. M. Abdullaev	44	45
Discharge-Diffusion Chamber with Working Volume 60×45×18 cm — T. T. Barnaveli, N. S. Grigalashvili, A. K. Dzhavrishvili, Z. Sh. Mandzhavidze, and T. I. Sharabidze	47	48
Automated Method of Determining the Fission-Fragment Track Density in Solid-State Track Detectors with the Aid of the MAGMO-1 System — V. S. Bychenkov, V. D. Dmitriev, A. I. Obukhov, and O. E. Shigaev	49	50
Scintillation Hodoscope for the Measurement of Ionization Losses of Relativistic Particles — R. G. Astvatsaturov, V. I. Ivanov, V. A. Kramarenko, A. I. Malakhov, P. V. Moisenz, E. N. Matveeva, T. N. Pilipenko, A. E. Senner, and M. N. Khachaturyan	53	53
Use of Dislocation-Free Silicon in Fully Depeleted Nuclear-Particle Detectors — L. S. Gatsenko, M. É. Kaganskaya, N. B. Tyurina, and O. P. Fedoseeva	57	56
Use of the Reaction $^{10}B(n, \alpha)^{7}Li$ to Determine the Distribution of Boron Implanted in Silicon — J. Bogáncs, J. Gyulai, A. Hagy, V. M. Nazarov, Z. Seres, and A. Szabo	59	58
Concerning the Determination of the Fano Factor in Semiconductors — Yu. V. Pyatkov, N. G. Volkov, I. A. Shlyapina, A. A. Byalko, and A. K. Churakov	65	64
Time-Dependent Properties of Proportional Counters SRPO-304 — A. A. Gusev and G. I. Pugacheva	67	66

	Engl.	Russ.
Improved Charged-Particle Identification Device – V. N. Kadushkin, M. É. Kaganskaya, B. G. Skorodumov, Yu. N. Talanin, and I. I. Trinkin	70	68
EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING		
M-6000 Display for Spectrum Reduction – A. M. Kalashnikov, I. Yu. Petrov, and A. K. Sheremet'ev	74	72
Input of Two Information Streams from Independent Sources into an Electronic Computer – V. V. Pechenin, A. A. Chumachenko, and V. I. Shul'gin	75	73
Sampling and Memory Unit Based on Integrated Microcircuits – I. K. Krylov and V. N. Kuleshov	78	76
High-Speed Analog–Digital Converter – A. A. Golovanov, Yu. V. Zykov, V. A. Mil'chakov, and V. V. Churkin	79	77
High-Speed Analog–Digital Converter with Logarithmic Scale – Yu. I. Belonosov and V. E. Yamnyi	81	79
High-Speed Integrated-Microcircuit Comparator – E. P. Vetlugin, A. I. Lavrushev, P. M. Povidaiko, G. N. Tychina, and N. V. Yasinskii	85	82
Digital–Analog Converter with Power-Law Characteristics with Linear Interpolation – V. E. Yamnyi, Yu. I. Belonosov, and A. G. Ivanov	87	84
ELECTRONICS AND RADIO ENGINEERING		
Apparatus for Difference-Method Reduction of Statistical Pulsed Fluxes with Small Instrumental Error – D. D. Natanzon	90	87
High-Voltage Magnetic Generator of Nanosecond Pulses – V. A. Petrov, V. A. Petrov, and U. Éberl'	94	90
System for the Control of the Parameters of a Capacitive Storage – O. M. Nikov, V. A. Kirpichnikov, G. V. Pudkova, and V. G. Khomyakov	96	92
Pulse Generator to Supply Acoustooptical Shutters – A. A. Prishutov and V. E. Terent'ev	98	94
Highly Stable Controlled Sources of Pulsed Oscillations Using a Charge-Storage Diode in the Feedback Loop – D. A. Efremenko, I. A. Malevich, and S. I. Chubarov	101	97
High-Voltage Pulse Front Correction with the Aid of Electrically Exploded Conductors – E. I. Azarkevich, N. I. Zaitsev, and Yu. A. Kotov	105	101
Adjustable Shaper of Modulating Voltage Pulses – V. V. Arsen'ev, V. D. Letnikov, I. N. Matveev, Yu. V. Prichko, and A. N. Stepanov	108	103
Pulse Shaper Using Variometers – G. M. Kuperman, P. A. Novysh, and A. D. Pliss	110	106
Diagram of Synchronous Light Modulator – G. N. Éritsyan, R. A. Melkonyan, Yu. R. Nazaryan, and A. A. Saakyan	112	108
Simple Pulse Duration Discriminator – M. N. Aliev and Sh. A. Kiyasbeili	113	109
Multichannel Recorder for Single Signals – Yu. I. Belonosov and V. E. Yamnyi	115	110
Precision Field-Effect-Transistor Gate – Yu. I. Belov and Yu. A. Sukoro	117	112
High-Speed Gate for High-Frequency Signals – M. A. Garibov, N. L. Guseinov, F. N. Kuliev, S. M. Mamedov, and A. G. Spirin	119	113
High-Speed Optoelectronic Gate – V. P. Sharov	121	115
Discrete Frequency Discriminator Using Microcircuits – M. I. Andreev	122	116
Installation for the Study of Synchronization of Microwave Generators – F. R. Abdrashitov and S. N. Kulaev	124	118
Waveguide Wavetrap – N. F. Kovalev, M. G. Reznikov, and Ya. Z. Slutsker	126	120
Self-Tuning Active Low-Pass Filter – A. V. Tarasov and L. P. Tarasova	129	123
Broadband Amplifier with Passband Exceeding 300 MHz – Yu. A. Volkov, I. I. Il'yushenko, V. A. Korolev, and V. M. Paskhin	133	127
Chlorine Nuclear Quadrupole Resonance with Exact Reading of the Resonant Frequency – N. V. Anisimov, N. N. Dzbanovskii, and Yu. S. Konstantinov	135	128
Analog Calculator of the Fourier Transforms for Pulsed NMR Experiments – A. A. Sukhovskii	137	130

Volume 22, Number 1, Part 2 January-February, 1979

Measurement of the Amplitude of an Alternating Magnetic Field by Means of Electron Paramagnetic Resonance – M. M. Tel'minov, É. É. Perepechai, and M. K. Zvezdin	141	133

	Engl./Russ.	
Magnetic-Field Modulator with Discrete Set of Frequencies for an EPR Radiospectrometer – V. L Aleksandrovskii, V. V. Butskii, and V. N. Linev	143	135
Stepping System of Scanning on the Basis of a Programmed Reversible Counter F5007 – G. V. Zhivukin	145	137
Magnetic-Flux Stabilizer – E. V. Kiyanovskii and A. F. Varenik	147	139
Active-Resistance Converter into Frequency with Linearization of the Conversion Characteristic – I. F. Ostrovskii, V. M. Frolov, and L. D. Garin	149	141
Linear Frequency–Voltage Converter for the Investigation of Nonstationary Adsorption and Desorption Processes – M. N. Glazov and L. F. Ivantsov	151	143
Thyristor Frequency Meter with Improved Linearity and Increased Output Current – V. M. Kul'gavchuk	154	146
Frequency Meters with Transistorized Release Device and Constant Ampere-Second Area – V. M. Kul'gavchuk	156	147
Cancellation of Nonlinearity of the Scanning of a Transmitting Television Camera – Yu. A. Drozhbin, V. E. Prokopenko, L. A. Rass, and B. M. Stepanov	158	149
Unit for the Compensation of the Nonuniformity of a Television Signal – O. L. Kulyas, V. G. Balobanov, and M. M. Fedorchenko	160	151
Correction of the Frequency Characteristics of Bolometers – A. V. Afonin, V. P. Korotkov, and L. A. Khrebtov	163	154
Stabilization of the Sensitivity of a Bolometer – G. A. Zaitsev, V. P. Korotkov, and I. A. Khrebtov	166	156
Precision Small High-Voltage Stabilized Photomultiplier Power Supply – V. I. Anikin	169	159
GENERAL EXPERIMENTAL TECHNIQUES		
Controllable Electron Gun with Plasma Cathode – M. A. Zav'yalov, and V. L. Perevodchikov	171	162
Orbitron Pump for Mass Spectrometers – G. A. Samsonov, A. A. Sysoev, V. I. Kutsuruba, Yu. T. Kalinin, and V. N. Filatov	174	165
Ion Source for Quadrupole Mass Spectrometer – Yu. T. Kalinin, A. A. Sysoev, V. N. Vilatov, and R. S. Khafizov	177	167
Photoreceiver for the Investigation of Resonant Fluorescence of Inert Gases in the Vacuum Ultraviolet – P. K. Telbizov, E. D. Mishchenko, and M. P. Chaika	180	170
Measurement of the Refractive Index of Solids with the Aid of a Modulation Fabry–Perot Interferometer – A. L. Étsina	182	172
Influence of Optical Instruments on the Polarization of Light – A. L Vikhorev	185	175
Compact Electric-Discharge CO_2 Laser with Emission Energy 30 J – Yu. V. Afonin, A. G. Ponomarenko, A. M. Orishich, and S. P. Shalamov	188	178
Pulsed Electric-Discharge CO_2 Laser with Stable Parameters – A. L Karapuzikov	191	181
Intermode Beats in CO_2 Lasers and their Use in an Automatic Frequency-Control System – P. A. Bykov, V. Z. Galutin, V. P. Epifanov, A. N. Sviridov, and V. R. Shumakov	194	183
Influence of Acoustic Inteference and Current Fluctuations on the Technical Line Width of CO_2 Laser Beats – P. A. Bykov, V. P. Epifanov, and A. N. Sviridov	196	185
Simple Carbon Dioxide Amplifier – V. V. Apollonov, A. L. Barchukov, S. I. Derzhavin, L G. Kononov, K. N. Firsov, Yu. A. Shakir, and V. A. Yamshchikov	199	188
Installation for the Measurements of the Intensity of the Second Optical Harmonic of Laser Radiation in a Liquid – V. P. Ermakov, L S. Kabanov, and V. F. Shabanov	202	190
Choice of Reflection Coefficients of the Resonator Mirrors of Laser for Intraresonator Q-Switching – É. S. Vorobeichikov, B. L. Pivovarov, L. N. Popov, and B. N. Poizner	205	193
Interference Method of Measuring Focal Distances of Thermal Lenses in Active Elements of Solid-State Lasers – Yu. L. Kopylov	207	195
Metal–Ceramic Discharge Chamber for a Nitrogen Laser with Transverse Excitation – V. F. Papakin and A. Yu. Sonin	210	197
Emergency Protection for a Laser-Pump Flash-Lamp Block Fed from an Inductive Energy-Storing Unit – É. A. Azizov, and Yu. G. Gendel'	211	198
Lower-Temperature Hydrostatic Pressure Chamber up to 30 kbar of Nonmagnetic Materials – E. S. Itskevich, A. N. Tolmachev, A. M. Shirokov, and N. M. Gridina	214	201
Electromechanical Vibrating System for the Observation of Small Periodic Mass Variations – V. I. Panov and V. N. Frontov	217	204

Engl./Russ.

Diffraction Interferometer in a Ballistic Experiment – V. A. Komissaruk, V. P. Martynov, and N. P. Mende 221 207
X-Ray Installation for the Registration of Rapid Processes – E. P. Evseenko, E. L. Zil'berbrand, and G. S. Pugachev 223 210
X-Ray Method of Measuring Small Deformations of Single-Crystal Plates – V. D. Skupov and V. I. Pashkov 225 212
Threshold-Potential Spectrometer Based on an Auger Electron Spectrometer – V. T. Cherepin, M. A. Vasil'ev, O. A. Yakubtsov, Yu. N. Ivashchenko, and E. F. Klimchuk 227 214
Installation for the Measurement of the Hall emf and of the Magnetoresistance of Low-Resistance Materials by the Amplitude-Modulation Method – E. V. Kolla and L. N. Luk'yanova 229 215
Use of the Spreading-Resistance Method to Monitor the Resistivity and the Thickness of Epitaxial Layers of Semiconducting Materials – V. A. Malyshev 232 218
Semiconductor Detectors for the Measurement of Infrared Radiation Pulses – A. B. Meshcheryakov 235 220
Heat Capacity of Ferroelectrics Measured by the Dynamic Method at High Hydrostatic Pressures – V. A. Chernenko, L. N. Polandov, and V. K. Novik 237 222
Calorimeter for the Measurement of the Energy Stored in Materials with Low Thermal Diffusivity – V. G. Vologin, A. L. Kozlov, S. F. Dubinin, Yu. T. Chukalkin, B. N. Goshchitskii, V. D. Parkhomenko, V. V. Petrov, and S. K. Sidorov 241 225

LABORATORY TECHNIQUES

Optron-Type Readout Unit with Thyristor Level Shaper – A.I. Platunin 244 228
Optimal Rate of Flow of a Gas Sample through a Halide Leak-Detector Pickup – V. F. Rogal' 248 232
Lithium Trap for Argon Purification – E. A. Kushnirenko, V. S. Panin, and V. A. Shokhin 250 234
Container for Volatile Inorganic Hydrides of Specially High Purity – A. S. Yushin and Yu. A. Nechuneev 251 235
Production of Films of Substances with Complicated Composition by Discrete-Pulse Evaporation – L. A. Seliverstov 253 237
Manometric Tube with Valve – D. A. Pelykh, D. S. Ratmanskii, and A. F. Tsaritsenko 255 239
Precision Automatic Digital Barometer – V. G. Sborshchikov and A. E. Chudakov 256 239
Low-Temperature Radiometer with Conical Light Pipe – E. S. Avdoshin and V. B. Nikulin 259 242
Radiation Attenuator for the Wavelength Band 0.25–1 μm with an Attenuation Coefficient up to 10^5 – V. P. Mikheev, V. M. Ivanov, V. S. Balitskii, A. D. Zakirova, and A. N. Chuvyrov 261 244
Device for the Measurement of the Kerr and Faraday Magnetooptical Effects – M. A. Gurbanyazov, L. S. Lisker, S. F. Udal'tsova, and S. Ya. Yazliev 262 245
Spectral Characteristics of DKSSh Ultrahigh-Pressure Xenon Lamps Operating in a Pulsed Regime – E. I. Kotov, A. V. Nazarenko, and V. V. Semin 264 247
Installation for the Measurement of the Shear Stress of Solids at Low Temperatures and High Pressures – A. A. Zharov, Z. G. Makarova, G. P. Shakhovskoi, and V. M. Zhulin 266 248
Device for Uniaxial Deformation of Whisker Crystals at Helium Temperatures in a Magnetic Field – Yu. P. Gaidukov, N. P. Danilova, and M. B. Shcherbina-Samoilova 267 250
Rotation-Angle Pickup for Goniometer – V. I. Kulibaba 269 251
Preparation of Pellets of Boron Powder for X-Ray Investigations under Pressure – V. I. Kamenev and B. Ya. Sinel'nikov 270 252
Ohmic Contacts for Partially Compensated p-Si – G. A. Abramchuk, V. Ya. A'leksandrenko, V. A. Alekhin, and I. M. Kravchuk 271 254
Gallium-Arsenide Diode Temperature Sensors – L. P. Ivanov, M. E. Korenman, V. G. Lakhtikova, and G. L. Prikhod'ko 273 256
Automatic Contact Thermometer – G. P. Eremin and V. G. Kondratenko 275 257

NEW INSTRUMENTS

Simple Graphic Display – B. V. Zubkov 279 261
Universal System for the Registration of Spectra in Graphic and Digital Form – S. S. Tatarinov, V. M. Ékzarkho, and A. G. Finkel' 280 262

Program-Controlled Scaling Instrument – B. V. Zubkov 281 263
High-Speed Oscilloscope with Digital Output – L. M. Pakhomov and A. V. Cherkasov 282 264
Automatized Measuring Amplifier – Yu. A. Alabuzhev 283 265
Precision Peak Detector with Time Gates – V. I. Voronin 284 266
Pulsed Synchronization Unit – A. M. Kudryavtseva, O. M. Nilov, and V. N. Rybin 285 267
Microwave Generator with Digital Indication of Generated Frequency – B. A. Vtorushkin and A. A. Gritsenko 286 268
Magnetodiodes with Different Sensitivity to the Direction of the Magnetic Field – V. O. Abovyan, G. N. Egiazaryan, and G. A. Mnatsakanyan 286 269
"Diapazon" Temperature Variator – I. A. Bass, A. M. Gerdov, G. S. Gritsevskii, A. M. Drobiz, O. N. Denisov, and A. I. Kashlinskii 287 270
Multichannel Lightning Counter – A. A. Dul'zon and V. I. Potapkin 288 271
FÉU-130 Photomultiplier – N. N. Dunaevskaya, I. R. Aleksandrov, O. I. Ivanov, S. K. Kulov, A. M. Maksimov, N. G. Maksimova, L. A. Makedonova, and G. B. Stuchinskii 289 271

Volume 22, Number 2, Part 1 March-April, 1979

Organization of Modular Software-Managed Systems with Standard Interfaces – I. F. Kolpakov 291 7

NUCLEAR EXPERIMENTAL TECHNIQUES

Direct-Action Accelerators with Inductive Energy Storage and Exploding Conductors – Yu. D. Bakulin, V. S. Diyankov, V. P. Kovalev, A. I. Kormilitsyn, B. N. Lavrent'ev, A. V. Luchinskii, and V. I. Martynov 323 34
Regulating the Magnetization of Ferrite in Experiments on the Self-Acceleration of an Electron Beam – A. A. Rakityanskii 327 37
Functional Generator of the Controlling Voltage of a Linear Accelerator Energy Modulator – Yu. D. Beznogikh, M. A. Voevodin, and Sh. Z. Saifulin 330 40
Measurement of Integral Characteristics of Intense Pulsed Electron Beams – V. V. Glebov, V. A. Malafaev, and D. N. Novichkov 332 42
Method for Estimating the Density Distribution of a Deuteron Beam – Yu. G. Bessarabskii, S. B. Ovsyannikov, V. M. Prokop'ev, and S. P. Sukhoveev 335 45
Compact Notation of Second-Order Ion-Optical Coefficients for Sector Magnetic Analyzer – A. F. Malov and G. M. Trubacheev 337 47
Analysis of Operating Quality of a Stabilized Spectrometer for Scattered Gamma Radiation – O. M. Anshakov and V. A. Chudakov 339 48
Fast-Neutron Spectrometer Based on an Electrostatic Charge-Exchange Accelerator – A. M. Trufanov, V. S. Nesterenko, N. I. Fetisov, G. N. Lovchikova, V. G. Demenkov, O. A. Sal'nikov, V. A. Romanov, A. I. Glotov, V. I. Spirin, G. V. Kotel'nikova, and V. S. Bashmakov 342 50
Transit-Time Neutron Diffractometer for Studying Monocrystals – B. N. Anan'ev, A. M. Balagurov, I. P. Barabash, Z. Georgiu, and V. D. Shibaev ... 347 55
"Crystal" Goniometric Setup with Electronic Control System – N. A. Agarkov, V. G. Gorbenko, Yu. V. Zhebrovskii, A. S. Zelencher, L. Ya. Kolesnikov, A. L. Rubashkin, and V. F. Chechetenko 350 57
Joint Operation of a Streamer Chamber and Conversi Hodoscopic Tubes – V. V. Govorov, V. A. Davidenko, B. A. Dolgoshein, A. N. Lebedev, and S. V. Somov 353 60
Use of the Hough-Powell Digitizer to Measure Film from the Bubble Chamber "Mirabelle" in K^+p Experiment at 32 GeV/c – A. A. Borovikov, V. V. Bryzgalov, S. A. Gumenyuk, A. M. Rybin, and G. N. Khromova 356 63
High-Voltage Supply Circuit for Multigap Spark Chambers – P. S. Anan'in, I. V. Glavanakov, A. P. Kashirin, and V. N. Stibunov 359 66
Efficiency of Detection of Gamma Quanta by NaI (Tl) Crystals for Volume Cylindrical Sources – V. P. Bamblevskii 362 68
Dual Proportional Counter for Recording Transition Radiation – A. A. Gusev, N. I. Nazarova, G. I. Pugacheva, and A. F. Titenkov 367 72

An Efficient Neutron Detector Containing ^{3}He for Transit-Time Spectrometry – V. N. Bogomolov, L. I. Zakharkin, V. A. Kuznetsov, and O. I. Shchetinin 370 75
Position-Sensitive Proportional Counter for Neutrons – V. S. Gal'tsov, I. I. Zakharkin, V. A. Kuznetsov, and O. I. Shchetinin 374 78
Position-Sensitive Superconducting Radiation Detector – A. F. Vasilevich, N. A. Kiyachin, V. K. Lyapidevskii, and V. B. Perezhogin 376 81

EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING
Device for Measuring the Lifetimes of Nuclear Levels with an On-Line Computer – B. A. Alikov, Ya. Vavryshchuk, Z. V. Krumshtein, K. M. Muminov, T. M. Muminov, R. R. Usmanov, F. Kh. Khamraev, G. Khemnits, and N. N. Khovanskii 378 83
Method for Computer Processing of Experimental Information – L. M. Breev 383 88
Use of MIR-2 Computer for Visual Display of Half-Tone Images – V. I. Zabolotskikh, N. I. Kalyadin, and V. E. Katsman 386 90
Vidicon as a Buffer Storage in TV Measuring System – V. V. Volkov, V. V. Kantserov, A. G. Lapuk, Yu. V. Ozerov, and S. A. Plakhov 389 93
Analog-to-Digital Converter with Cyclic Refinement of Result – A. D. Azarov, M. E. Borodyanskii, and V. L. Onopko 392 96
Structural Method of Correction of Time-to-Pulse Type of Analog-to-Digital Converter with Preservation of Operating Speed – I. V. Semerkov and O. P. Aleksandrov 394 98
Digital Display Unit of CAMAC Crate – N. I. Zamyatin and D. A. Smolin 397 101

ELECTRONICS AND RADIO ENGINEERING
Short-Time Orthogonal Correlation Analyzer with Time-Scale Conversion – S. F. Simovskaya, V. S. Golikov, and E. Z. Sakhnovskii 401 104
An lf and vlf Spectrum Analyzer – S. A. Alekperov, Ch. O. Kadzhar, E. Yu. Mamedov, and É. A. Salaev 404 107
Coincidence Circuits Based on Priority Time Discriminators – E. Winkler, V. M. Grebenyuk, and V. G. Zinov 406 109
Digital Device for Eliminating False Signal Transitions through Zero – A. S. Glinchenko and M. K. Chmykh 410 112
Unit for Subtracting Two Pulse Trains – N. F. Nikitenko, E. A. Skurko, and Yu. V. Titov 414 116
High-Speed Integrated-Circuit Decade Counter – V. M. Lachinov 416 118
Simple Binary-Coded-Decimal Decade Counter – N. N. Balamatov and V. Yu. Zalivako 422 124
Eight-Bit Digital–Analog Converter – V. P. Martsenyuk and N. A. Morozov 423 125
High-Speed Analog–Digital Converter – E. P. Vetlugin, A. I. Lavrushev, E. D. Marinina, P. M. Povidaiko, and A. N. Sobolev 424 126
Integrating Analog–Digital Converters Based on Chemotrons – A. A. Konovalov 427 129
Converter of Small Carrier-Frequency Shift to Constant Voltage – F. V. Smirnov and S. S. Sulakshin 429 131
Compact High-Voltage Pulse Generator with Pulse Transformer – S. B. Evlampiev, Yu. F. Sviridov, and V. V. Khmyrov 431 133
Gas Mixture $N_2 + SF_6 + Ar$ for a High-Pressure Discharger – B. M. Koval'chuk, V. A. Lavrinovich, Yu. F. Potalitsyn, and V. V. Toptygin 434 135
High-Voltage Pulsed Strong-Current Apparatus with High Operating Frequency – G. S. Korshunov, Yu. A. Krasnyatov, V. V. Ustyuzhin, and V. V. Khmyrov 436 137
High-Voltage Transistor Amplifier of Unipolar Pulses – A. A. Titov and L. G. Boltovskaya 439 140
Rectangular Pulse Generator – V. E. Baron, V. I. Kononovich, and V. S. Sosenko 441 142
Low-Frequency Pulse Generators Based on Cascade Transistors – A. A. Sterlyagov 443 144

Volume 22, Number 2, Part 2 March-April, 1979

Multifunctional Wideband Single-Shot Multivibrator – Yu. G. Budyashov, E. Winkler, V. M. Grebenyuk, and V. G. Zinov 447 146

Shaper of Actual Parameters of Random-Process Extrema – A. V. Blokhin, M. I. Kolodin, V. A. Romanov, Yu. I. Rebrin, and V. I. Yanenko 450 149
Range Shaper of Orthogonal Voltages – L. E. Bykova and S. S. Kuznetskii 452 151
Application of Ribbon Permalloy Cores in Nonlinear Shaping Lines – V. A. Vizir' 454 152
Four-Quadrant Analog Signal Multiplier – V. B. Kashkin, A. A. Sukhovskii, and V. S. Trishkin, A. A. Sukhovskii, and V. S. Trishkin 457 155
Programmable Attenuator – A. A. Shakhin and A. Ya. Stul' 458 156
Wideband Oscilloscope Input Attenuator – D. A. Kachina, E. S. Mironov, V. N. Vishnevskii, and V. M. Nemirovskii 461 158
Adjustable Amplitude Selector – B. M. Savichev, G. A. Aver'yanov, Yu. V. Pleshanov, and V. S. Proshina 463 160
Active Band-Pass Filter for Infralow Frequencies – V. A. Romanov, A. V. Blokhin, M. I. Kolodin, and Yu. I. Rebrin 465 162
Microcircuit Gyrator Filters – I. V. Abramov and G. S. Ostapenko 467 163
Frequency-Separating Four-Port Ring Network for Wideband rf and shf Channels – O. V. Alekseev, V. V. Obrovets, and G. G. Chavka 469 165
Thermoelectric Transducer for an shf Field Based on Hot Electrons – S. I. Gechyauskas, Yu. K. Pozhela, and K. K. Repshas 472 168
Synchronous Detector of Low-Frequency Signals – V. I. Gavrilenko and M. A. Ruban 476 171
Synchronous, Measuring, Alternating-Voltage Transducer – A. A. Dmitriev and V. S. Maslov 479 174
Measuring-Time Shaper for Digital Integrating Instruments – Kh. A. Ismailov, D. I. Damirov, and L. M. Ryskin 481 175
High-Speed Device for Time Interval Measurement – E. I. Kovrigin, V. S. Chernyshev, and Yu. V. Shumkin 484 178
Photomultiplier Current-to-Frequency Converter – N. P. Kul'bachuk 486 180
Signal Transfer along Parallel Channels in Analog Equipment Using Charge-Coupled Devices – V. B. Ivanov, V. L. Krayushkin, and N. L. Panteleev 487 181
Scan-Forming Unit for Controlling Coupled Beams from an Electron-Beam Probing Device – V. N. Ordinartsev, V. A. Khmara, and O. S. Shvedov 489 183
Cathode-Ray Curve Tracer Based on an S1-37 Oscilloscope with Memory – A. A. Antonov, A. L. Lyam, and A. N. Makarov 492 185
Cathode-Ray Curve Tracer for Recording the Volt–Farad Characteristics of p–n Transitions with Large Losses – V. A. Dvinskikh, V. P. Parusov, and A. S. Sergeev 493 186
Device for Suppressing Impact Noise during Measurement of the Parameters of Piezoelectric Transducers – G. A. Tarasov and V. M. Timofeev 497 189
Apparatus to Measure Low-Noise Signal Levels in the Presence of a Periodic Sequence of Powerful Radio Pulses – D. P. Sobolev and V. E. Semenov 499 191
Improved RÉ-1306 Radiospectrometer for Investigation of Crystals – S. L. Votyakov, A. A. Krasnobaev, A. B. Gramolin, and A. M. Sukhikh 502 194
Large-Scale Automation of a Nuclear Magnetic Resonance Magnetometer – É. V. Dvornikov .. 504 195
Polarizer for Magnetizing Liquid in NMR Resonance Devices – A. P. Ezyukov and A. I. Zhernovoi 508 199
Automatic Measurement Using Resonance of the Magnetic Induction of Fields of Superconducting Solenoids – E. P. Sapunov, A. I. Okhrimenko, I. A. Kulik, and V. I. Kurochkin 511 202
Decoder for 7-Segment Indicators with Minimum Number of Elements – V. Yu. Kapustin and O. I. Nikolaichuk 514 205
Methods of Voltage Stabilization in Converters without Transformers – L. M. Braslavskii, A. M. Sazhnev, and V. G. Kobylyanskii 516 206
Electronic Voltage Control of B5-24A High-Voltage Source – E. F. Klimchuk, V. T. Cherepin, and O. A. Yakubtsov 525 215
Economic Voltage Indicator for Independent Power Supply – I. A. Dubrovskii and A. I. Sheremet'ev 526 216

GENERAL EXPERIMENTAL TECHNIQUES

Cathode Assembly for Gas-Discharge Instruments – N. F. Lazarev and D. B. Arshba 528 218
Use of Mixtures of Hydrogen with Certain Gases to Increase the Proton Yield in a High-Frequency Ion Source – A. M. Markus, V. F. Udovenko, and N. I. Velichko 530 220

Simple Gas Analyzer Based on a Thermocouple Vacuum Gauge – K. Sh. Agababyan, A. A. Aroyan, and R. T. Mina 532 222
Focusing of Photoelectrons in an FÉU-49 Photomultiplier – V. L. Dadykin, Ya. S. Elenskii, and A. L. Tsyabuk 534 223
Comparison of the Time Resolution of Photoelectric and Dynode Channel Multipliers – A. I. Ivanov, A. G. Kotik, E. A. Frolov, and I. A. Kharitonov 538 227
Inverse-Magnetron Mass Spectrometer – V. N. Pakulin 540 229
Installation for Studying the Luminescence of Microspecimens – S. L. Votyakov, S. N. Volkov, A. A. Krasnobaev, V. Ya. Krokhalev, and M. V. Samatov 544 232
Method for Investigating the Color-Temperature Characteristics of Cholesteric Liquid Crystals – L. M. Klyukin, M. M. Nezhevenko, A. S. Sonin, and I. N. Shibaev 546 234
Photoreceiver with Noise-Level Stabilization at the Output – S. E. Sebko 550 238
Pulsed Submillimeter Laser with Optical Pumping for Plasma Diagnostics – O. F. Manita 552 240
Frequency-Stabilized Ruby Laser – A. N. Bondarenko and S. V. Kruglov 555 242
Wideband Unit for Phase–Frequency Locking of Lasers – V. G. Gol'dort, V. F. Zakhar'yash, and B. A. Kurnevich 557 244
Use of Liquefied Gases in Optical Low-Temperature Chamber with Fixed Pressure – M. I. Eremets and A. M. Shirokov 562 248
Superconducting Quantum Magnetic Fluxmeter with Expanded Passband – Ya. I. Gitarts and N. V. Zavaritskii 565 251
High-Speed Superconducting Bolometer Based on Double Films of Ag+Sn – G. A. Zaitsev and I. A. Khrebtov 568 254
Obtaining Equipotential Patterns with Increased Accuracy on a Scanning Electron Micoscrope – V. G. Dyukov, M. I. Kolomeitsev, S. I. Gavrikov, and N. N. Sedov 572 258
Multichannel, High-Speed, X-Ray Spectrometer – V. A. Bondarenko, I. I. Magda, S. I. Naisteter, S. S. Pushkarev, and G. V. Skachek 575 261
Generator of X-Ray Radiation Pulses – P. N. Yarovoi 578 263
Measurement of the X-Ray Emission Spectrum of a Plasma Focus – V. N. Suvorov, N. A. Tulin, and V. I. Potikha 579 264

LABORATORY TECHNIQUES

A Simple Attachment to the SÉS2-03 Gamma Spectrometer – S. A. Negrei 583 268
Simple Precision Temperature Regulator for High-Power Heaters in the 50–1200°C Range – B. A. Komarov and V. I. Sopryakov 584 269
Helium Level Gauge with Semiconductor Sensor – M. A. Arutyunyan and G. D. Movsesyan 586 270
Monitor for Level of Liquid Nitrogen – T. S. Voznyi 587 271
Self-Opening Valve for Nitrogen Decanting Siphon – S. A. Melikyan and R. T. Mina 588 272
High-Voltage Protection for Electronic Equipment – O. M. Nilov, G. V. Pudkova, and Yu. A. Tverdov 589 273
Evaporator for Electron Diffraction Analysis of Substances in the Gaseous Phase – M. V. Popik, L. V. Vilkov, V. S. Mastryukov, and A. V. Golubinskii 591 274
Solid-State Oxygen Flow Regulator – M. D. Geraimchuk, V. K. Grishin, and P. M. Talanchuk 593 276
Device for Heating and Heat Treatment of Oxide Cathodes – Yu. N. Voronov and V. V. Uskov 595 277
Recording Diffuse Reflection Spectra with an SF-8 Spectrophotometer – A. V. Nogin and Ya. É. Shmulyakovskii 596 278
Dacron Attenuator of CO_2-Laser Radiation – G. I. Levin 597 279
A Laser Microrefractometer for Measuring Temperature Gradients in a Liquid – V. A. Bazhinov, O. A. Evtikhieva, B. S. Rinkevichyus, and S. K. Sharov 598 280

NEW INSTRUMENTS

STB-4 Correlator – A. I. Bondarev, Yu. E. Voloshin, S. I. Isataev, V. S. Stepanov, and S. B. Tarasov 602 283
Precision Strain Gauge for the Range from 0.05 to 5000 μm – A. I. Savinkov 603 283
UZT-2 Ultrasonic Hardness Tester – A. A. Lebedev, L. Ya. Levitan, A. N. Fedorchenko, and A. V. Sharko 604 284

	Engl./Russ.	
YaPB-2 Automatic Small Nuclear-Resonance Hygrometer – I. S. Danilyuk, I. I. Kravets, G. A. Labai, O. I. Pechenko, and P. M. Soprunyuk	605	284
Device for Measuring Intensity of Random Signals – L. A. Zhurakovskii, Yu. I. Korotchenko, F. G. Uzenbaev, and V. V. Chichilanov	606	285
Digital Measuring Device for Low Temperatures – V. K. Beresnev	607	285
Wideband Power Amplifier – A. A. Titov	608	286
High-Gain Wideband Transistor Amplifier – A. V. Serebryakov, A. I. Brunev, V. A. Sutorikhin, V. Ya. Gyunter, A. I. Silyutin, L. A. Yauk, G. M. Nilova, A. A. Kuz'min, and B. F. Golev	608	286
Subnanosecond Controlled-Gain Amplifier – V. D. Obikhvostov, A. I. Pavlov, and A. V. Baidali	609	287

Volume 22, Number 3, Part 1 May-June, 1979

Time Domain Spectroscopy of Dielectrics (Survey) – Yu. D. Fel'dman, Yu. F. Zuev, and V. M. Valitov	611	5
Thermoluminescent LiF Detectors (Survey) – K. M. Kudelin	630	21
NUCLEAR EXPERIMENTAL TECHNIQUES		
Systems for Magnetization of Ferrites in Tunable Accelerating Resonators for Proton Synchrotrons – L. I. Averbukh	640	29
Magnetomodulation Device for Measuring the Current of a Beam of Charged Particles – B. A. Baklakov, V. F. Veremeenko, M. M. Karliner, A. A. Litvinov, and S. P. Petrov	646	34
Device for Continuously Monitoring the Energy Spectrum of an Electron Beam – K. A. Vinogradov	650	38
Measurement of the Intensity of Inelastic Scattering of Mössbauer Gamma Quanta – V. S. Zasimov, R. N. Kuz'min, and N. N. Lobanov	654	41
SKAT Bubble Chamber – Housing and Main Structural Components – V. I. Ermolaev, E. P. Kuznetsov, O. I. Mikhailov, M. A. Samarin, V. I. Snyatkov, A. V. Astakhov, V. A. Bol'shakov, G. A. Grad, I. F. Malyshev, and V. N. Odintsov.	657	43
Photoregistration System of the SKAT Bubble Chamber – A. I. Boginskii, V. I. Ermolaev, N. P. Zhuravlev, S. N. Zimin, V. A. Krendelev, E. P. Kuznetsov, O. I. Mikhailov, N. A. Netyaga, V. Ya. Potapov, V. G. Rybakov, V. I. Rybachenko, V. I. Snyatkov, V. S. Filippov, and A. N. Sharykin	661	47
Pressure-Changing System for the SKAT Propane–Freon Bubble Chambers – V. M. Androsenko, V. I. Ermolaev, I. N. Ivakhnenko, V. I. Kozlov, V. M. Korablev, V. A. Krupnov, E. P. Kuznetsov, V. V. Makeev, O. I. Mikhailov, M. A. Samarin, V. I. Snyatkov, N. A. Chabrov, A. V. Astakhov, V. A. Bol'shakov, and G. A. Grad	665	50
Magnet for the SKAT Bubble Chamber – Main Parameters and Magnetic Field Measurements – A. I. Boginskii, E. P. Kuznetsov, V. V. Makeev, O. I. Mikhailov, Yu. G. Ryabov, V. I. Snyatkov, G. A. Grad, N. I. Doinikov, and V. P. Muratov	670	54
Possible TV Recording of Particle Tracks in Streamer Chamber – V. V. Volkov, V. V. Grechnev, V. V. Kantserov, and S. V. Somov	674	57
3 × 1.5-m Proportional Chamber and Its Characteristics – A. V. Vishnevskii, I. A. Golutvin, A. V. Zarubin, Yu. L. Zlobin, Yu. T. Kiryushin, N. A. Kuz'min, L. V. Svetov, D. A. Smolin, Yu. A. Yatsunenko	677	60
Characteristics of 3 × 1.5-m Proportional Chamber under Large Loads – A. V. Vishnevskii, I. A. Golutvin, A. V. Zarubin, Yu. T. Kiryushin, N. A. Kuz'min, D. A. Smolin, and Yu. A. Yatsunenko	681	63
Geiger Coordinate Counters – Yu. V. Dubrovskii and V. D. Neskov	683	65
Geiger and Proportional Counter Backgrounds Determined by Hard Cosmic Radiation – R. J. Krupa	688	70
Effective Speed of Propagation of a Light Signal in a Position-Sensitive Scintillation Counter – V. G. Bondarenko, V. A. Grigor'ev, and V. A. Kaplin	694	75
Neutron Detectors with Nanosecond Time Resolution – V. N. Kononov, E. D. Poletaev, L. E. Kazakov, and M. V. Bokhovko	696	77

Engl./Russ.

High-Efficiency Ion-Implanted Semiconductor Counter for Neutrons – I. G. Gverdtsiteli, A. I. Guldamashvili, V. D. Zhirnov, T. M. Agrba, and T. A. Shaumyan 700 81
Mosaic Semiconductor Detectors for Nuclear Radiation – B. A. Nikitin, O. V. Zakharchuk, A. P. Konovalov, A. V. Sliva, and O. P. Fedoseeva 703 83
New Data on Dielectric-Breakdown Heavy-Ion Counters Based on MOS Structure – A. N. Smirnov 706 86

EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING

Applications of Computer Engineering in Experimentation-Independent Control Unit for Universal CAMAC Branch Driver – L. G. Efimov and E. V. Chernykh 710 90
Simple Digital-Code-To-DC Converter – V. G. Koltunov, V. V. Kravchenko, and A. K. Maistrenko 714 94
Code-Phase Converter – A. T. Matchak and T. I. Tomson 715 95
Digital Band Filter – A. K. Gorshkov, V. A. Lesnikov, E. P. Petrov, and A. V. Chastikov 717 97
Device for Outputting Information from Digital Devices onto a Punched Tape – G. I. Bazarov 721 100

ELECTRONICS AND RADIO ENGINEERING

High-Speed Analog Storage Device with a Two-Step Conversion Cycle – M. I. Demchuk and V. N. Khaiminov 725 103
Two-Way Counter with Digital Display – A. Abdukayumov, R. G. Akhmedov, R. O. Sosnovskii, and A. A. Khalikov 727 104
Digital–Analog Conversion Unit with Stabilization System and Digital Display – V. F. Borzhkovskii, V. G. Vlasov, I. I. Zalyubovskii, N. K. Mukhachev, N. G. Stervoedov, A. I. Frolov 729 106
Successive-Approximation Amplitude-To-Digital Converter – A. L. Gonchar 734 111
Statistical Averaging of Noise from Address Counter in Analog-To-Digital Converter with Amplitude-To-Time Conversion – A. L. Gonchar, V. R. Trubnikov, and V. L. Regushevskii 737 113
Multichannel Noise-Stable Quantized Delay – V. A. Fon'kin, G. G. Yakushev, and L. Ya. Polonskii 739 115
Broad-Band Sawtooth Voltage Generator – A. A. Belyi and N. N. Skrigan 742 118
Crystal Oscillator without Inductance Excited at the Mechanical Harmonics of the Resonator – A. L. Borisenko and O. T. Sokolov 743 119
Amplifier–Shaper for Drift Chambers – S. G. Basiladze and L. Lokhonyai 746 122
Pulse Amplifier with Digital Gain Control – V. F. Borzhkovskii 749 125
Low-Noise Preamplifier with a Low-Temperature uhf n-InSb-Based Detector – N. N. Kabdin, V. N. Krymov, A. M. Neboshchik, L. G. Oranskii, and V. N. Saraev 752 128
Amplifier with Automatic Gain Control – V. A. Larionov 755 130

Volume 22, Number 3, Part 2 May-June, 1979

ELECTRONICS AND RADIO ENGINEERING

Normalizing Amplifier – A. A. Galitskas 757 132
Current Integrator Based on an F30 Digital Device – M. S. Birulev and B. V. Fefilov 759 133
Automatic Meter of the Amplitude–Phase Field Configuration in Open Cavities – I. V. Ivanchenko 760 135
Phasemeter without Frequency Conversion in the 20 Hz-60 MHz Band – A. M. Fishtein 762 137
Decoupling–Matching Transformer for Improvement of Current Rise Time in a Low-Inductance Load – A. B. Andrezen, V. A. Burtsev, V. G. Bakuta, V. M. Vodovozov, A. A. Drozdov, and Yu. K. Pchelintsev 765 140
Simple Transistor Frequency Multiplier – A. Z. Venger, A. N. Ermak, and A. M. Yakimenko 768 143
Small-Size Filter in Transcritical Waveguide with Dielectric – M. N. Berger, B. Yu. Kapilevich, and N. S. Simin 770 145
Measuring Negative Resistances of Two-Terminal Networks with an RZ-10 Instrument – A. S. Kosov and I. A. Strukov 772 147

	Engl./Russ.	
Apparatus for the Accurate Measurement of Ultrasonic Velocity by the Pulse-Superposition Method – A. M. Antonenko and M. D. Volnyanskii	774	148
Calculation of Optimal Configuration of Shims for High-Resolution NMR Radiospectrometers – A. A. Lukhvich and V. R. Churilo	776	150
Voltage Regulator with Low Output Impedance – B. G. Denison	777	151
Cascade-Type Transformerless Low-Voltage Rectifier with Increased Efficiency – L. G. Zotov and I. V. Zolotarev	780	154
GENERAL EXPERIMENTAL TECHNIQUES		
Ignition of a Vacuum Arc in Stationary Sources of a Metal Plasma from an Autonomous Plasma Injector – I. I. Aksenov and V. A. Belous	785	160
Distribution of FEU-28 Photomultipliers According to Values of Longitudinal Resistance of Photocathodes – V. M. Modrinskii and I. Z. Rutkovskii	787	162
Scintillation Neutron Detector with an Electronic Device for Rapidly Changing the Multiplication Factor of a PM – S. L. Bogolyubskii, V. V. Vasilevskii, V. I. Liksonov, and V. P. Smirnov	788	163
Effect of the Method used to Regulate the Amplifier Gain on Time of Flight of Electrons for the FEU-30 – D. A. Gladyshev and B. N. Li	791	165
Effect of the Potential of the Outer Surface of the Bulb of an FEU-49 on the Time of Flight of Photoelectrons – Ya. S. Elenskii	793	167
Device for Mass-Spectroscopic Analysis of Microconcentrations of Gaseous Impurities in Nonconducting Materials – I. L. Agafonov and A. I. Kuz'michev	797	171
Calculation of Cylindrical Radio-Frequency Mass Analyzer – V. N. Pakulin	799	173
Pulsed Gas-Discharge Lamp with Traps for Erosional Electrode Particles – Yu. G. Basov, S. A. Boldyrev, S. F. Dzyubanov, and V. V. Fomin	800	175
Pulsed Lamp for the Optical Orientation of Metastable Helium Atoms – V. D. Mel'nikov and B. N. Sevast'yanov	802	175
Investigation of a Subnanosecond Neodymium Glass Pulse Oscillator with the Aid of High-Speed Oscillography – A. G. Berkovskii, N. E. Bykovskii, Yu. I. Gubanov, N. V. Gusev, N. V. Pletnev, Yu. V. Senat-skii, G. V. Sklizkov, A. N. Sushchenko, and R. P. Tarasov	804	178
Interference-Immune Control Module of a Pulsed Frequency Laser – V. A. Kalachikov, V. S. Kondrat'ev, and A. V. Kovtun	809	182
A Scheme for the Automatic Fine Frequency Tuning of the Radiation from a Helium–Neon Laser along the Lamb Depression – V. A. Khanov	811	183
High-Sensitivity Systems for Recording the Spectral and Temporal Characteristics of Pulsed Light – I. N. Andreev, I. Ya. Braverman, G. A. Meerovich, and V. N. Ulasyuk	813	185
Multichannel Photodetector for Space–Time Recording of an Optical Signal – I. A. Bubnov	817	189
Comparison of Solid Media which Transmit Pressures up to 130 kbar in an Anvil Device with a Lune Toroid – Yu. A. Litvin	820	191
Sensing Element for Normal Stresses in a Solid Medium at High Pressures – Yu. F. Shul'pyakov, A. I. Kolomiitsev, T. N. Solov'eva, and T. V. Olyunina	822	194
Recording Unit for an Atomic Probe – N. V. Nikonenkov	825	196
Effectiveness of Modulation of X-Ray Tubes – N. S. Zinchenko and V. D. Stasenko	829	200
Operational Possibilities for Si(Li) X-Ray Spectrometers at Temperatures from −900°C to −60°C – N. Ya. Sedov, V. A. Kostin, N. E. Mazurik, and A. K. Pustovoit	832	202
LABORATORY TECHNIQUES		
Twin-Chamber Flexible Vacuum Connection – G. P. Shemonaev and I. S. Sidorenko	836	206
Measurements of Small Mechanical Displacements and Vibrations of Specimens Using a Laser – V. A. Domyshev and V. A. Proshin	837	207
Water Cooling of the DKsSh-1000 Lamp – I. A. Ar'ev	839	209
High-Temperature Resistance Oven – V. V. Grigor'yants, V. A. Detinich, M. E. Zhabotinskii, G. A. Ivanov, V. N. Isakov, A. G. Novikov, and V. V. Storozhev	840	210
Magnetooptical Cryostat for Temperatures below 1°K – G. Liid'ya	842	211
Semiconductor Resistance Thermometers for the Interval 300–0.3°K – K. N. Zinov'eva, L. I. Zarubin, I. Yu. Nemish, F. M. Vorobkalo, and S. T. Boldarev	845	214
System for Recording the Activation Times of Pulsed Light Source – G. I. Mishin and O. G. Rutkin	848	216
Analysis of Diffuse Light Spectra with Microwave Thermophotoindicators Based on Cholesteric Liquid Crystals – V. I. Maksimov and V. A. Chetkarev	849	218

Infrared Radiation Detector – V. A. Zakharenko and A. V. Shmoilov 852 220
Low-Temperature Blackbody – A. K. Pavlyukov and G. K. Kholopov 854 222
Synchronization of an LG-36A Laser with an SFR-2M Camera – S. I. Grinyuk and V. I. Lisichenko 855 223
Laser Dosimeter – P. A. Kuznetsov and V. M. Fedorov 857 224
Heater for High-Pressure Gas Thermocompressor – M. M. Korsunskii 858 226
PP-8 Radiometer to Monitor Foil Thinning by Jet Electropolishing – A. I. Evstyukhin, V. V. Nikishanov, and A. V. Shul'ga 860 227
Hardening of Alloys with a Rapid Rate of Cooling – V. N. Sumarokov and E. M. Savitskii 861 228
Vacuumless Cryostat for Optical Investigations of Semiconductors – A. N. Lukin, V. A. Yukish, and V. S. Kavetskii 863 230
Contact Cryogenic Fluid Level Sensor – V. N. Pavlov and Ya. Konichek 864 231
Cascade Transistor-Based Transducer for Converting the Level of a Liquid into Frequency – V. P. D'yakonov, A. A. Sterlyagov, V. M. Stel'makh, and A. S. Ul'yanov 868 232

NEW INSTRUMENTS
VIR-72 Microrheometer for Studying Low-Viscosity Liquid Media – A. N. Sundukov and P. A. Ivanov 868 234
Shch4311 Digital Multimeter – V. A. Dzhegur, N. N. Kozakevich, V. D. Malyukov, A. A. Pevko, M. G. Sytnik, and E. A. Shulyakovskii 868 235
Measuring Converter for Small Currents – I. D. Goncharenko and Yu. N. Medyanovskii 869 236
Contactless Voltage Indicator with Digital Readout – L. P. Gosteva, V. G. Kokovikhin, A. A. Kotunov, K. P. Mal'chenko, A. T. Smolin, and N. I. Yakovlev 870 237
Instrument for Measuring Delays of Television Channels (MTC) – Yu. A. Fedorov and V. Ya. Bol'shakov 871 238
"Vector" Digital Device for Measuring Frequency Characteristics – V. G. Maurer and G. V. Suvorov 872 238
Instrument for Recording Time and Frequency Television Signals (RTV-Ch) – Yu. A. Fedorov and V. Ya. Bol'shakov 873 239
Interpolation Device for Measuring Time Intervals – S. V. Denbnovetskii, S. M. Kokoshkin, and A. N. Shkuro 874 240
Calorimetric Device for Measuring the Energy of High-Power Isolated uhf Pulses of Nanosecond Duration – V. I. Zelentsov, G. V. Mel'nikov, and Yu. G. Yushkov 874 240
Input-Resistance Meter for Transistors – V. T. Vasil'ev, V. K. Popov, A. A. Safronov, V. S. Kharitonov, and A. N. Nikitina 875 241
Noise-Figure Meter for Transistors – V. T. Vasil'ev, V. K. Popov, A. A. Safronov, and V. S. Kharitonov 876 242
Ultrawideband Electrically Controlled Attenuator – V. D. Obikhvostov and A. V. Baidali 877 243
MI9302 Mass Spectrometer – G. S. Anufriev, G. I. Afonina, B. A. Mamyrin, V. T. Nenarokomova, V. A. Pavlenko, and A. E. Rafal'son 877 244
KM-6 Quadrupole Mass Spectroscopic Gas Analyzer – G. I. Slobodenyuk, V. I. Ivashkin, and V. S. Voronin 878 245
Molecular-Beam Modulator and Chopper – A. I. Volkov, B. E. Popov, and L. Yu. Rusin 879 246
Automatic Emergency Throttle for Mechanical Vacuum Pumps – B. V. Borts, S. F. Kravchenko, and V. P. Selivanov 880 247
ST-1 Hot-Wire Anemometer System – A. L. Bondarev, Yu. E. Voloshin, S. I. Isataev, V. S. Stepanov, and S. B. Tarasov 881 248
System for Measuring Pulsed Magnetic Fields – V. T. Volokhov, V. V. Kargal'tsev, V. A. Kiselev, V. I. Kupchik, and T. I. Sil'vestrov 881 249
Photodetector Head for Laser Radiation at 10.6 μm – A. A. Zelenov, V. I. Lashkov, and E. P. Semenov 882 250
Rotation-Frequency Meter – L. S. Udut and A. Yu. Chernyshev 883 251
Digital Radioisotope Denistometer for Light Media – V. A. Chudakov, O. M. Anshakov, Yu. G. Kononov, A. M. Lyutsko, and P. F. Safronov 884 252
Functional Generator for Electrochemical Investigations – A. I. Bykh and A. V. Kukoba 885 253
Thermoelectric Microrefrigerator – G. A. Ivanov, S. V. Ol'shanskii, A. F. Panarin, V. K. Voronin, and V. P. Nizhergorodov 886 254
Set of High-Precision Phase-Setting and Phase-Measuring Apparatus – M. K. Chmykh, A. S. Glinchenko, V. I. Kokorin, M. M. Michurina, and S. V. Chepurnykh 886 255

Volume 22, Number 4, Part 1 July-August, 1979

	Engl./Russ.	
Use of Microprocessors in Instrument Design and in Experimental Investigations (Review) — Ya. M. Damatov, N. M. Nikityuk, and R. Shyussler	889	7
NUCLEAR EXPERIMENTAL TECHNIQUES		
Betatron with Magnetic Excitation — V. V. Vasil'ev, V. A. Moskalev, and E. G. Furman	908	27
Experiments on Recuperation of the Energy of a Monoenergetic Electron Beam in a Collector of Special Configuration — S. K. Dimitrov, A. S. Luts'ko, and S. G. Mikhin	911	29
Proton Beam Source — V. L. Auslender, V. N. Lazarev, and A. D. Panfilov	915	33
Pulsed Desorption Slot Cathode — E. N. Danil'tsev and V. I. Pershin	918	36
Gamma Bremsstrahlung from a Thin Target of a Betatron — B. I. Goryachev, E. S. Krylov, O. P. Shevchenko, and V. V. Ékivin	922	40
Neutron Beams of the Leningrad Institute of Nuclear Physics Synchrocyclotron — V. N. Vaturin, V. P. Koptev, E. M. Maev, M. M. Makarov, V. V. Nelyubin, V. V. Sulimov, A. V. Khanzadeev, and G. V. Shcherbakov	927	44
Water Trap for Shutting Off the Neutron Beam from the Vertical Channel of a Research Reactor — V. P. Fedunin	930	47
Thermomagnetic Gates for Ultracold Neutrons — Yu. V. Nikitenko and Yu. V. Taran	932	49
Mass Spectrometer with an Electrostatic Filter "in Line" with an Accelerator — B. N. Belyaev, L. N. Gall', R. N. Gall', V. D. Domkin, Yu. G. Korobulin, L. M. Krizhanskii, and V. D. Sachenko	934	51
Ninety-Channel Cherenkov Mass Spectrometer for High-Energy Electrons and Gamma Quanta (The "Photon" Installation) — G. A. Aberichev, V. V. Arkhipov, R. G. Astvatsaturov, V. V. Bakaev, A. M. Baldin, S. G. Basiladze, L. S. Boitsova, L. B. Golovanov, Yu. V. Zanevskii, A. B. Ivanov, V. I. Ivanov, I. M. Ivanchenko, A. D. Kirillov, E. Knapik, I. F. Kolpakov, V. A. Kramerenko, B. A. Kulakov, Yu. V. Kulikov, B. K. Kuryatnikov, L. G. Makarov, A. I. Malakhov, E. A. Matyushevskii, V. L. Mazarskii, G. L. Melkumov, P. V. Moisenz, V. T. Parshutov, V. D. Peshekhonov, N. N. Plyashkevich, S. N. Plyashkevich, A. E. Senner, V. A. Smirnov, B. M. Starchenko, V. T. Trofimov, M. N. Khachaturyan, A. P. Tsvinev, A. S. Chvyrov, S. P. Chernenko, and R. Firkovski	940	57
Wide-Range Magnetic Analyzer of Reaction Products on a Beam of Heavy Ions — V. Z. Maidikov, Yu. V. Gofman, G. S. Popeko, and N. K. Skobelev	951	68
High-Speed Photorecorders for the Five-Meter Magnetic Spark Spectrometer of the Joint Institute for Nuclear Research — E. M. Andreev, V. I. Aparin, I. M. Vasilevskii, A. T. Vasilenko, Z. Zhenchikevich, N. D. Krakhotin, V. A. Moiseenko, V. L. Rybakov, and N. S. Tolstoi	956	73
Liquid-Argon, Cylindrical, Pulsed, Ionization Chamber — A. S. Barabash, A. A. Golubev, O. V. Kazachenko, and B. M. Ovchinnikov	958	75
Tskhra-Tskaro Wide-Gap Spark Chamber — Yu. A. Gromov, D. M. Kotlyarevskii, S. D. Kananov, V. G. Matsaberidze, I. V. Morozov, T. B. Metreveli, V. M. Rappoport, M. M. Taglanov, P. V. Tsomaya, T. I. Sharabidze, and G. Z. Shemanetyan	962	79
Effect that the Gate Setting of the Recording Apparatus has on the Parameters of Experimental Mössbauer Spectra — S. D. Karakishev	964	81
Multichannel, Wide-Aperture, Cherenkov Counter — Yu. M. Antipov, V. A. Batarin, V. A. Bezzubov, N. P. Budanov, Yu. P. Gorin, S. P. Denisov, A. A. Lebedev, A. I. Petrukhin, S. A. Polovnikov, V. N. Roinishvili, and D. A. Stoyanova	968	84

	Engl.	Russ.
Light Yield of CsI(Tl) and CsI(Na) Crystals under Bombardment by Charged Particles — D. Dorchioman, M. Konstantin, D. Lazarovich, I. Muntyanu, K. O. Oganesyan, and S. Yu. Porokhovoi	970	86
High-Speed Transmission Avalanche Counter for Recording Charged Particles — W. Neubert and F. Dubbers	973	88
Registration of Pulsed Radiation by Means of Surface-Barrier Semiconductor Detectors — G. A. Gurov, M. A. Savel'eva, and G. P. Tochilovskii	976	91
Surface-Barrier Au(Si)-Detectors with Protective Glass Walls — V. V. Pevtsov and V. V. Krayukhina	980	96
Use of the SnO_2—Si Heterotransition in Design of Position-Sensitive Structures — I. I. Evseev, V. V. Kryachko, L. N. Sukhotin, and A. I. Stukalov	982	97
EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING		
Electronic Device for Registering Signals from Proportional Chambers Based on the Specialized K405KhP1 Integrated Circuit — S. G. Basiladze and V. K. Yudin	985	100
Organization of a Lengthened Camac Branch — V. D. Inkin, V. P. Nikolaev, G. A. Filina, and L. A. Yukov	990	106
Interface Charts Conforming to IEC Standards for a Punch Card Machine and Photographic Reader — A. N. Domaratskii, S. N. Domaratskii, V. A. Liskin, N. V. Ponenko, and L. S. Sitnikov	993	109
Hookup of VT-340 Display as Operating Panel of "Élektronika-100/16I" Computer — N. I. Konov	1002	118
Device for Forming Symbols on Screen of Television Display Unit — V. M. Kirpichnikov and V. P. Khoteev	1006	121
ELECTRONICS AND RADIO ENGINEERING		
Device for Levelling Statistically Distributed Pulses — G. I. Il'kanaev, V. G. Iskenderov, and G. L. Melikov	1010	125
Digital Device for Measuring Time Intervals — S. V. Denbnovetskii, S. M. Kokoshkin, and A. N. Shkuro	1012	127
Integrating Device for Converting Voltages into Time Intervals — V. M. Frolov and A. B. Andreev	1019	134
Contactless Measuring Device for Conversion of Constant Currents — M. P. Vasil'ev, V. G. Ivkin, Yu. Kan, I. V. Mozin, and Yu. S. Obidenko	1022	137
Highly Stable Multivibrators Based on TTL Integrated Microcircuits — V. P. D'yakonov and P. G. Lykov	1026	141
Self-Excited shf Transistor Oscillator with Electronic Frequency Tuning — N. I. Bobrovnikova, K. P. Gorshenev, and Yu. E. Kivokurtsev	1029	143
All-Purpose Measuring Amplifier — S. I. Kutsarov and D. I. Mikhailova	1030	144

Volume 22, Number 4, Part 2 July-August, 1979

ELECTRONICS AND RADIO ENGINEERING		
Composite Operational Amplifier and Analog Memory Based on It — G. N. Sofiev, A. A. Mitin, G. A. Aref'eva, A. M. Gromov, and Yu. Yu. Palkin	1033	146
Scanning Operational Amplifier with Tunable Passband — L. I. Tsytovich	1036	149
Phase-Stable Amplifier with Automatic Regulation of the Amplifier — A. M. Fishtein	1040	153
Intermediate-Frequency Amplifier of an EPR Spectrometer — V. N. Linev and V. B. Mochal'skii	1043	155
High-Speed Differential Amplifier Using Discrete Components — A. I. Antonevich, V. V. Butskii, and S. S. Vetokhin	1044	157
Thyratron Generator of High-Power Nanosecond Pulses with Increased Efficiency — V. A. Vizir', N. A. Lashuk, V. P. Orel, and V. P. Shcherbinin	1046	158
A Pulse Generator — M. I. Vakhrin	1049	161
Stability of a High-Voltage Spark Gap with a Flow of Working Gas between the Electrodes — A. S. El'chaninov, F. Ya. Zagulov, S. D. Korovin, and G. A. Mesyats	1051	162

Powerful High-Voltage Pulsed Transformer — S. S. Vdovin 1053 164
Capacitor Battery for One Megajoule Having a Small Time Constant — V. A. Burtsev, V. N. Litunovskii, V. F. Prokopenko, and G. M. Makeev 1056 167
Correction of the Pulse Shape of an Arkad'ev—Marks Voltage Generator — E. A. Abramyan, E. N. Efimov, and G. D. Kuleshov 1060 170
Low-Impedance Line with Ferrite Inductance for Formation of Abrupt Drops of Electromagnetic Power — A. I. Dubnev and I. G. Kataev 1063 172
Pulse Former with Adjustable Steepness of Linearly Changing Wavefront and Signal Amplitude — É.M. Spiridenkov and N. A. Timofeev 1065 174
Device for Precise and Smoothly Adjustable Delay over a Wide Range of Nanosecond Logic Pulses — A. G. Morozov 1067 175
Transformer Discharging for High-Volgate Circuits — V. S. Belkin 1070 178
Measurement of High-Frequency Fields in Resonators — V. L. Auslender and A. D. Panfilov 1072 180
Rectangular Resonator in the 3-cm Range for Observation of Double Electron—Nuclear Resonance — V. P. Meiklyar, M. L. Falin, and B. S. El'man 1075 183
Attachment to the RYa-2308 Radiospectrometer for Studying Double Magnetic Resonance — P. A. Vasil'ev, V. G. Petrov, P. O. Okulevich, and A. N. Glebov 1077 184
Method for Measurement and Calculation of Small Complex Impedances in the rf Range — M. S. Kosilov, V. V. Sinitsyn, and V. T. Grechnev 1079 185
Device for Measurement of FET Transfer Characteristics — A. A. Zaluzhnyi, V. I. Lavrukovich, and V. S. Sedyakin 1082 188
High-Voltage Power Supply System for Electrostatic Deflector — V. A. Akkuratov, A. A. Glazov, V. V. Kudryashov, M. M. Semenov, N. G. Shakun, and Yun Ho Zin 1083 189

GENERAL EXPERIMENTAL TECHNIQUE

Four-Electrode Electron Gun with Emission into the Atmosphere of a Stream with a Cross Section of 10 × 80 cm — Yu. V. Grigor'ev and L. P. Shanturin 1088 194
Annular Electron Gun Design — G. P. Prudkovskii and A. V. Khotina 1090 196
Annular Electron Gun Construction and Experiment — V. A. Polinovskii, G. P. Prudkovskii, and A. V. Khotina 1094 199
Magnetic Discharge Cells with Nonuniform Periodic Magnetic Field — V. N. Pakulin 1098 202
Units for Measuring the Work Function of a Metal by the Vibrating Capacitor Method — J. Baczyński, H. Malecki, and M. Stempiński 1101 205
The MI9302 Mass Spectrometer for the Analysis of Microscopic Amounts of Inert and Chemically Active Gases — B. K. Alekseichuk, A. S. Anufriev, G. I. Afonina, A. M. Bronshtein, Yu. M. Efis, V. A. Zagulin, E. M. Kleshkov, B. A. Mamyrin, V. T. Nenarokomova, V. P. Pavlov, V. A. Pavlenko, and A. É. Rafal'son 1103 206
Operation of the MI9302 Mass Spectrometer in the Static Mode — G. S. Anufriev, G. I. Afonina, B. A. Mamyrin, V. T. Nenarokomova, and A. É. Rafal'son 1108 211
Device for Automation of Measurements in Monopolar Mass Spectrometer — A. L. Yakimakha, L. F. Berzin, V. K. Lyashko, and B. G. Golubovskii 1111 213
Influence of Laser Irradiation of a Mass Spectrometer Ion-Field Source Emitter on the Magnitude of the Ion Current — I. L. Agafonov and V. I. Faerman 1116 218
Magnetic Dichrograph — V. A. Figlovskii and Yu. A. Sharonov 1118 220
Three-Channel Far Infrared Detector Based on Cooled Si:B, Ge:B, n-GaAs Photoresistors — V. B. Lazarev and É. A. Tishchenko. 1121 222
Use of KS Glasses for Passive Shutters in Generation of Ultrashort Pulses — I. M. Korda 1125 226
Magnetooptical Apparatus for Measuring the Faraday Effect and Susceptibility of Magnetic Thin Films — V. A. Yatsenko and V. A. Bokov 1127 227

Electromagnetic System to Control the Angular Position of Optical Elements of Lasers — V. V. Zaika and S. V. Koval'chuk 1130 230
Side Cathode for Powerful Argon Laser — A. G. Mal'tsev 1134 233
Increasing the Operational Reliability of the Automation Unit for the LG-32 Laser — V. G. Tarasyuk and V. A. Khanov 1136 235
Device for Measuring Transmission Coefficient of Objective Lenses — A. K. Pavlyukov and G. K. Kholopov 1138 237
Free Suspension of Magnets in Constant Magnetic Field with Aid of Pyrolytic Graphite — V. M. Ponizovskii 1140 238
Parametric Transducer for Displacements under Dynamic Damping — V. A. Krysanov, M. I. Kuklachev, and V. N. Rudenko 1143 240
Arrangement for Studying Field Emission in the Nanosecond and Subnanosecond Ranges — B. A. Koval', D. I. Proskurovskii, and V. P. Rotshtein 1146 243
Field-Emission Microscopes for the Investigation of the Emission Properties of Single Crystal Faces — A. L. Suvorov, A. F. Bobkov, B. Ya. Kuznetsov, and S. V. Zaitsev 1151 248
Small Spectrometer for Excitation Potentials of Soft X Rays — I. A. Brytov, B. E. Blekher, and G. E. Belinskii. 1154 251
Method of Measuring Contact Resistances — Yu. I. Ageev, I. A. Sagaidachnyi, and L. S. Stil'bans 1157 253
Spectroscopy of Deep Impurity Levels by the Compensation Method — V. Ya. Prints and K. G. Bulateskii 1160 255
Instrument for Automatic Measurement of Profile of Shallow-Level Concentration — O. M. Orlov, V. Ya. Prints, and E. M. Skok 1163 258

LABORATORY TECHNIQUES
Clock Unit Based on Ferroelectric Device — A. A. Grekov, N. A. Korchagina, and E. D. Rogach 1167 262
Double-Shield Connector — G. A. Lobanov 1168 263
Control of Resistance of Metal—Oxide—Metal Point Contact with a Mechanical Corrector — A. A. Rivlin. 1169 264
Filling of Dischargers with a Mixture of SF_6 and N_2 — A. I. Gerasimov and V. B. Saltykov 1171 265
Preparation of 350NNI Ferrite for Its Use in Systems with a Superhigh Vacuum — V. A. Vizir' and Yu. K. Pastukhov 1173 267
Control of the Motion of the Cathode Spot of a Vacuum Arc — L. P. Sablev 1174 268
Device for Cooling the Ion Source of the MI-1305 Mass Spectrometer to Nitrogen Temperatures — I. A. Rat'kovskii, A. G. Nalivaiko, and S. B. Tsirganovich 1176 269
Fabrication of Indium Seals by Prepressing — A. S. Shuvalov and L. A. Filatovskii 1177 270
Production of Oblique Cuts of Thin Films by Etching — K. G. Hartsman, T. T. Dedegkaev, I. I. Kryukov, and V. A. Moshnikov 1178 271
Scanning Attachment to Prism Monochromator — V. P. Bludov 1179 272
Cuvette for a Cu Laser with Excitation by a Transverse Discharge — O. I. Buzhinskii, S. I. Krysanov, and A. A. Slivitskii 1181 274
Snap Connector for a Monofiber Optical Cable — I. A. Gavrilov, I. V. Knyazhechenko, V. A. Kuznetsov, V. P. Sosnin, and A. V. Frantsesson 1184 277

NEW INSTRUMENTS
Multipoint Monitoring and Measuring System with Remote Digital Displays — V. S. Grubnik, V. I. Kuchmasov, E. A. Lomtev, V. D. Mikhotin, V. M. Tikhonov, and V. M. Shlyandin 1186 279
SSPU-1 Multichannel Synchronizing Generator — V. G. Brovchenko, V. M. Nazarenko, and V. A. Tsvetkov 1186 280
Test-Pulse Generator — A. N. Morgunov, A. M. Nelidkin, and V. V. Yakunin . . 1188 281
Generator of Pseudorandom Radio-Pulse Sequence — A. N. Morgunov and A. M. Nelidkin 1188 281
Audio-Frequency Signal Generator with Stabilized Amplitude — V. M. Sergeev, Yu. G. Svinolupov, V. I. Petrochenko, and Yu. K. Rybin 1189 282

High-Speed Automated Storage Oscillograph with Processor — S. V. Denbnovetskii, I. I. Orlov, A. K. Shkuro, N. G. Ivanushkina, L. N. Ovsyannikova, and G. N. Kutlin 1190 283
Small-Sized Low-Frequency Part of Modulation Radiometer with Remote Control Panel — V. S. Zborovskii, R. A. Samoilov, O. K. Morozova, B. K. Fedyantsev, and V. V. Khrulev 1191 284
Broad-Band Transistorized Mixer — S. V. Melikhov and G. I. Shaikin 1191 285
"Poisk-A", an Instrument for Locating and Addressing Conductors — V. A. Bondar', V. L. Savchuk, and A. A. Skotnikov. 1192 286
Universal Ultrahigh-Vacuum System — E. M. Bazarnyi, V. V. Gigor'ev, N. S. Korol'kov, V. G. Pankov, and E. A. Tarasov 1193 287

Volume 22, Number 5, Part 1 September-October, 1979

CAMAC Serial Highway (Survey) — V. A. Fóteev 1195 7

NUCLEAR EXPERIMENTAL TECHNIQUES
Microsecond High-Current Electron-Beam Accelerator — V. A. Burtsev, M. A. Vasilevskii, O. A. Gusev, I. M. Roife, E. V. Seredenko, and V. I. Éngel'ko. 1223 32
Energy Calibration of the ÉGP-10M Accelerator — S. P. Simakov, V. I. Spirin, A. M. Trufanov, and G. N. Lovchikova. 1227 36
Pulsed Ion Injector for an Electrostatic Accelerator Using Bunching in a Distributed Electric Field — A. S. Belov, Yu. M. Burmistrov, and G. A. Yurchenkov. 1230 39
Criteria for Identification of a Reaction and Rejection of Poorly Measured Events — A. R. Linetskii, G. Ya. Lyubarskii, and N. E. Sagalovich. 1233 42
Experimental Setup with Proportional Chambers — A New Instrument for Investigation of Double Beta Decay — Yu. G. Zdesenko. 1236 44
Low-Background Setup for Studying Double Beta Decay — Yu. G. Zdesenko, V. N. Kuts, I. A. Mytsyk, and A. S. Nikolaiko 1239 47
Wide-Aperture, Transit-Time, Charged-Particle Spectrometer — B. M. Abramov, É. A. Airapetov, L. S. Bagdasaryan, I. A. Dukhovskoi, V. V. Kishkurno, A. P. Krutenkova, V. V. Kulikov, M. A. Matsyuk, I. A. Radkevich, E. N. Turdakina, and V. S. Fedorets . . 1245 52
Method for Monitoring the Law of Motion of Mössbauer Vibrators — L. Tsankov and K. Burin 1250 57
Highly Stable Control Unit for the Moving System in a Mössbauer Spectrometer — P. K. Kirillov and V. D. Sedykh. 1251 58
Germanium X-Ray Spectrometer — N. Ya. Sedov, G. A. Shishkina, B. M. Bezymyannykh, and T. M. Pershikova. 1254 61
Wire-Electrode Track Spark Chamber of Area 11 m^2 — N. N. Nurgozhin, B. N. Akhmedov, A. I. Dauletbakov, and Zh. Zh. Musul'manbekov 1256 63
Measurement of Time of Spark Formation in a Spark Chamber for α and β Particles — P. S. Anan'in, O. A. Sidulenko, and E. V. Fotin 1260 68
Use of the HP-9820 Desktop Calculator in Processing Photographic Data from Spark Chambers — V. D. Kozlov 1263 70
Effects of Gamma Radiation on Efficiency of Registration of Fission Fragments in a Spark Counter — V. L. Kuznetsov, V. G. Nedorezov, and N. V. Nikitina. 1265 72
Calculation of Physical Characteristics of Cerenkov Scintillation Telescope by the Method of Statistical Testing — N. A. Gun'ko, Yu. A. Gur'yan, and É. A. Tropp 1268 75
Inhomogeneity of Light Collection in a Large Scintillation Counter — A. N. Alent'ev. 1271 77
Microchannel-Plate Timing Detector — V. I. Dukhanov, A. A. Kurashov, I. B. Mazurov, and I. N. Serikov. 1274 80
Background Count Rate in an Alpha Radiometer Employing Surface-Barrier AuSi Detectors — A. A. Petushkov and V. A. Manchuk. 1276 82
Operating Stability of Germanium Radiation Detectors — V. P. Gimanov, D. A. Goganov, L. K. Gerasyuta, and V. V. Korolev 1279 85

EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING
Autonomous Diagnostic System for a Beam of Particles — S. G. Basiladze, L. N. Komolov, and V. K. Yudin. 1284 90
Automatic System for Recording and Processing Probe Characteristics in a Low-Temperature Plasma — S. V. Kiryukhin, V. S. Lozyuk, A. Ya. Oleinikov, A. Ya. Smirnov, A. V. Stepkin, N. A. Tikhomirov, A. I. Chmil', and E. G. Shustin 1287 93
Interfacing the MIR-2 Computer with Experiments — V. M. Popov. 1290 96
Improved Data Interface for the Nairi-2 — A. V. Zhuk 1297 102
Device for the Input of Video Information into an Electronic Computer — V. P. Andreev and G. G. Vainshtein. 1300 106
Signal Distributor — V. S. Kotov 1304 110
Device for Digital Selection and Compression of Data from Semiconductor Spectrometers — M. I. Skopyuk and V. A. Shevchenko. 1307 112
Compact Unit for Logic Signal Delay — S. I. Merzlyakov and Nguen Ngok Lam. . 1309 114

ELECTRONICS AND RADIO ENGINEERING
Selection and Storage Device — L. A. Dubitskii and V. N. Osipov. 1311 116
Method for Measuring Noise Characteristics of Analog Commutators — A. G. Dorosh, V. A. Mokritskii, and Yu. B. Sigunov. 1313 118
Counting Decade Based on Microcircuits with Digital Display — V. D. Sibirtsev and I. S. Rabtsevich. 1315 120
Time-Interval Measurement by Regressive Coincidence — N. R. Karpov, Yu. D. Matyukhin, and N. N. Povarenkin. 1317 121
Pair-Coincidence Matrix — S. V. Dementii, V. M. Denyak, A. V. Fartushnyi, and V. I. Ogurtsov. 1319 123
Device for Recording the Time Distributions of Coincidences in a Multidetector System — L. V. Krasnov and I. C. Yatsyshin. 1321 125
Microcircuit-Based Integrodifferential Discriminator — V. V. Butskii and S. S. Vetokhin. 1324 128
Strobed Integral Pulse Discriminator — N. N. Balamatov and Yu. V. Nil'sen. . 1326 130
Rectangular Voltage Pulse Generator — L. G. Koshcheev. 1327 131
High-Current High-Voltage Nanosecond Keys Using High-Power MOS Transistors — V. V. Bachurin and V. P. D'yakonov. 1330 134
Transistor-Diode Voltage Drop Formers with Pulse Front Duration Approximately 0.2 nsec — Ch. I. Pavasaris and V. I. Zhalkauskas 1333 137

Volume 22, Number 5, Part 2 September-October, 1979

Pulsed-Supply Avalanche Transistor Square Pulse Generator — V. V. Golubkov and A. V. Dorofeev. 1337 139
Pulsed Phase Shifter — V. I. Zametin and A. N. Putilin. 1339 141
Pulsed Phase-Locked Automatic Frequency-Control System Based on Microcircuits — V. P. Vasil'ev. 1343 144
Low-Frequency Quartz Oscillator Designed from Microcircuits — V. S. Korolev and E. N. Matin. 1349 150
Slow Sweep Generator — V. G. Shironosov. 1351 151
Paraphase Exponential-Step Sweep Voltage Generator for Energy Analysis of Charged Particles — A. V. Makienko and V. N. Rudkovskii. 1353 152
Broadband Stroboscopic Device for Measuring Instantaneous Values of Signals for an Electron Beam Oscilloscope — V. N. Vishnevskii, N. A. Kukharenko, and A. G. Petrovich. 1355 154
Low-Frequency Digital Frequency Meter — E. K. Inozemtsev and O. S. Babaeva. 1358 156
Economical Photomultiplier Power Source — Sh. R. Gizatullin. 1361 159
Compensated Current Source in the Submillimeter Range — N. I. Zheludkov, V. A. Kareev, and V. V. Meer. 1363 160

GENERAL EXPERIMENTAL TECHNIQUES
Device for "Firing" Macroparticles into a Hot Plasma — B. V. Kuteev and S. V. Shatalin. 1365 163

Ion Source of a Time-of-Flight Mass Spectrometer for Physicochemical Investigations of a Solid Surface — L. N. Grigorov and V. Ya. Munblit..... 1367 165
Electron Gun with a Plasma Cathode and a Built-In Compact Gas Generator — V. A. Gruzdev, Yu. E. Kreindel', and O. E. Troyan..... 1372 169
Compact, Five-Channel, Electrostatic Analyzer of Electron Energy Spectra — N. K. Berezhetskaya and A. A. Dorofeyuk..... 1374 171
Traveling-Wave Electron Detector — A. S. Goncharov, V. M. Kazakov, and O. V. Kozlov..... 1376 173
Dependence of Counting Characteristics of Secondary-Electron Multipliers on Residual Gas Pressure — V. N. Barkovskii, A. A. Vydrik, I. N. Korobkov, and V. G. Mikutskii..... 1379 176
Ion Source for the Investigation of Processes of Charge Exchange on Metal Atoms — R. N. Gall', N. V. Kir'yakov, M. I. Markin, V. L. Tal'roze, and S. V. Tirkel'taub..... 1381 177
Isotopic Analysis of Calcium — K. G. Ordzhonikidze, M. N. Kerner, V. V. Birkaya, and L. P. Parulava..... 1383 179
Enhancement of the Sensitivity of an Ion Analyzer Based on an MI-1305 Mass Spectrometer — B. D. Tserpitskii and V. F. Popov..... 1386 182
Xenon and Argon Flashlamps for Vacuum UV Radiation — Yu. S. Basov, S. A. Boldyrev, L. I. Gavrilova, A. S. Doinikov, and G. E. Tsvilyuk..... 1389 184
System for Stabilizing the Emission Power of a CO_2 Laser — A. S. Martynyuk..... 1392 186
UV and X-Ray Geiger Counters with a Spatial Resolution of 0.3 mm — V. D. Peskov..... 1395 189
Recording of Weak Light Signals in the 1.0-1.2-μm Wavelength Band — L. K. Vodop'yanov, L. V. Golubev, V. D. Kopanev, and V. G. Plotnichenko..... 1397 191
Transmission of Neutral Absorbers when Irradiated with Laser Radiation — E. N. Anuchin and G. I. Kadaner..... 1399 193
Solenoid for Generation of Initial Magnetic Flux in Implosion Generation of Superstrong Magnetic Fields — A. I. Pavlovskii, N. P. Kolokol'chikov, M. I. Dolotenko, and A. I. Bykov..... 1401 195
Device for Protecting Superconducting Magnets with a Superconducting Connector — D. Kabat, R. Lyudemann, Kh. Menke, and Yu. A. Shishov..... 1404 198
Galvanomagnetic Three-Component Magnetic Induction Gauze — S. A. Dolgii, A. A. Kukushkin, Yu. V. Kulikov, G. P. Nikolaevskii, V. T. Parshutov, and M. I. Yatsuta..... 1407 200
Measurement of Field Nonuniformities in the Gap of Precision Magnets — A. A. Savitskii and I. I. Nedbal'skii..... 1410 203
Compact 500-ton Hydraulic Press of Force — A. P. Novikov and M. D. Klimov..... 1413 206
Pressure and Temperature Distributions in Solid-Phase Cell with Large Useful Volume at 40 kbar and 1500°C — Yu. A. Litvin..... 1415 207
Automatic Setup with Piezoelectric Transducer for Continuous Measurement of Internal Friction and Elasticity Modulus of Solids — Yu. A. Burenkov, V. I. Ivanov, and B. K. Kardashev..... 1418 210
Calorimeter for Measuring the Heat Capacity of Small Specimens at Low Temperatures — N. M. Gavrilov, V. M. Polovov, and R. R. Ponomareva..... 1422 213

LABORATORY TECHNIQUES

Setup for Washing and Drying Multiwire Chambers — G. M. Kolachev, S. V. Krotov, G. D. Minakov, I. I. Nikachalo, and G. S. Filimonov..... 1427 217
Attachment to an RÉ-1301 Spectrometer for Studying Materials at Temperatures 120-350°C and Pressures 1-10^4 atm — A. I. Filippov..... 1428 218

A Highly Sensitive Barometer — V. I. Osika and C. Yu. Pashin..... 1430 220
Dilatometer Based on a 6MKh1S Mechanotron — S. M. Barmin, R. P. Krentsis, A. V. Mikhel'son, and P. V. Gel'd..... 1433 222
X-Ray Comparator for Accurate Measurement of the Cutoff Angle of a Piezoelectric Crystal — Yu. R. Blyashko, A. D. Ginzburg, V. N. Stasevich, and Yu. A. Terman..... 1436 225
Low-Temperature Gas Thermometers — B. V. Petunin and E. G. Son..... 1438 226
Flowthrough Optical Cryostat for a Superconducting Solenoid — V. I. Silaev, Yu. E. Stetsenko, A. I. Belyaeva, Yu. N. Stel'makhov, and G. S. Egiazaryan..... 1440 228
An Optical Cryogenic Illuminator — V. F. Solyanko and V. A. Kondratskii..... 1442 230
Single-Crystal Heater for Research on Orientation Effects — V. G. Karandashov, V. I. Roslyakov, A. S. Rudnev, and E. I. Sirotinin..... 1443 231
Programmable Temperature Regulator — Yu. K. Tarnopol'skii and S. V. Solov'ev..... 1445 233
Simple Thyristor Temperature Regulator — N. A. Mel'nichenko..... 1447 235
Expander for a Narrow-Band Telemetry System — V. A. Brasletov..... 1449 236
Universal Photoelectric Graduation Detector — A. I. Usoskin and K. A. Katrunov..... 1451 238
Self-Excited Oscillator for Examining a Multimode Piezoelectric Resonator — Yu. F. Orekhov and A. A. Borovik-Romanov..... 1453 239
Current Stabilizer for an Electromagnet — R. V. Telisnin, V. N. Dudorov, V. V. Randoshkin, and V. D. Chervenkov..... 1455 241
Triggered Light-Pulse Generator — V. I. Petrovskii..... 1457 243
Recording Optical Spectra in the Range 5000-10,000 cm^{-1} with the UR-20 Spectrophotometer — A. A. Kukharskii, S. V. Ordin, and V. K. Zaitsev..... 1459 245
High-Temperature Attachment to the IKS-21 Spectrometer — V. D. Golyshev, L. M. Lapo, V. A. Petrov, and Yu. M. Putilin..... 1460 246
Method for Checking the Quality of Multicolor Frames — N. M. Venttsel'..... 1462 248
Method for Measuring the Thickness of Dielectric Films and Refraction Index by the Method of Photoelectric Scanning — Yu. A. Snezhko..... 1463 249
Electrical Lead-Ins with Composite Seal for High-Pressure (to 5 kbar) Chambers — M. M. Korsunskii..... 1466 251
Piezoelectric Pressure Sensor — I. S. Glushkov, N. N. Turkova, and L. I. Arutyunova..... 1468 253
Microbalance with a Mechanotron Sensor — I. L. Zaitsevskii, A. I. Zelenkina, and A. N. Imenov..... 1470 254
Control of a Precision Measuring Table with a Hollow-Rotor Asynchronous Motor — V. G. Voinov, G. S. Ryazanov, and A. M. Seitimbetov..... 1473 258
Air Bearing for Precision Linear Displacement — V. V. Arkhipov and N. K. Balatsenko..... 1476 261
Preparation of Thin Semiconductor Wafers by Electrolytic Etching — V. G. Shengurov, V. N. Shabanov, A. G. Gur'yanov, and S. I. Kolomiets..... 1478 262

NEW INSTRUMENTS

Énergiya-1 Data Acquisition System — A. K. Shidlovskii, P. P. Ornats-kii, V. G. Kuznetsov, N. A. Yaremchuk, and D. K. Makov..... 1480 264
Experimental Setup for Investigating Gas Released from Construction Materials of Mass Spectrometer Instruments — A. P. Ivanov, I. V. Gudkova, V. P. Ryabov, A. I. Kholodov, and G. G. Pryamilov..... 1481 265
Automatic Processor for Atomic Absorption Signals — V. E. Baron, D. I. Dmitriev, V. I. Kononovich, and V. A. Sosenko..... 1482 266

Attachment to the DFS-8 Spectrograph for Oscillographic Recording of Line Shapes with High Time Resolution — L. I. Andreeva, V. S. Dobrolyubov, V. A. Zhovtyanskii, S. A. Kaidalov, E. M. Pchelov, B. M. Stepanov, and Yu. I. Chutov..... 1483 267
Optoelectronic Temperature Profile Recorder — D. A. Rapoport, V. S. Shchiptsov, and S. K. Isaeva..... 1484 268
Automatic Linear Expansion Coefficient Meter with Digital Readout — A. I. Fesenko, V. S. Borisyuk, and Yu. P. Menchev..... 1485 269
Automatic Thermal Conductivity Meter with Digital Readout — A. I. Fesenko and V. S. Borisyuk..... 1486 269
Automatic Digital Readout Device for Measuring Rate of Temperature Change — A. I. Fesenko, V. S. Borisyuk, E. I. Glinkin, and G. E. Ostrovskii..... 1487 270
YaRV-2 Compact Automatic Nuclear Resonance Hygrometer — I. S. Danilyuk, I. I. Kravets, G. A. Labai, O. I. Pechenko, and P. M. Sopryunyuk..... 1488 271
Hygrometer with a Heated Electrolytic Sensor — V. M. Gerasimov, G. I. Peredel'skii, and Yu. I. Sulimov..... 1489 272

Volume 22, Number 6, Part 1 November-December, 1979

Counting Errors in Amplitude Spectrometry of Pulses (Survey) — V. B. Ivanov, Yu. P. Sel'dyakov, and V. I. Shipilov 1491 14

NUCLEAR EXPERIMENTAL TECHNIQUES

Design and Characteristics of a Microtron in the 5-cm Range — M. A. Zakharov, V. N. Melekhin, and V. Ya. Sukhachev 1509 30
Measuring the Limits of Regions of Instability of Electron Beams — B. N. Zinchenko and N. S. Zinchenko. 1512 33
Compound for Calibration of ^{121}Sb Mössbauer Spectra — A. M. Babeshkin and R. A. Lebedev 1514 35
Possibility of Identifying Nuclear Reaction Products Using Avalanche Counters — D. Walzog, W. Neubert, Kh. Zodan, and N. K. Skobelev 1516 36
Spectrometry of Powerful Pulsed Electron Beams — P. I. Filimoncheva, V. V. Plokhoi, L. Yu. Samoilova, V. N. Afanas'ev, Ya. Z. Kandiev, V. D. Dartsev, and V. F. Khokhryakov 1520 40
Spectrometer for High-Current Hollow Electron Beams — S. P. Bugaev, K. A. Dergobuzov, A. N. Karmadonov, B. A. Kononov, V. I. Koshelev, and N. I. Yagushkin 1524 44
Optimization of Collimating Devices of Gamma-Cameras with Time Modulation of the Signal — G. A. Fedorov 1527 47
Light Yield of a Proportional Scintillation Counter at Low Pressures of the Filling Gas — Yu. E. Makovskii, V. I. Popov, I. V. Filyushkin, and A. S. Yakovlev 1531 50
Simple Circuit for a Meter of the Integral Radiation Dose of an Accelerator — V. A. Zapevalov and P. I. Reingardt-Nikulin 1537 55

EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING

Automatic Acquisition, Storage, and Processing of Experimental Cosmic-Ray Data with a Nairi-2 Digital Computer — V. V. Avakyan, L. S. Bagdasaryan, I. E. Vasinyuk, O. M. Vinnitskii, S. P. Kazaryan, Dzh. S. Oganezova, and A. G. Oganesyan. 1541 58
Encoder for Proportional Chambers — R. S. Radzhabov 1547 64
Device for Converting Sequential Code into Gray Code — A. I. Gonchar and V. R. Trubnikov 1550 67
Device for Outputting Data from an AI-1024 Analyzer to a Puncher — A. M. Kalashnikov, I. Yu. Petrov, and A. K. Sheremet'ev 1552 68
Simple Analog Storage Device — A. V. Beshkarev and I. I. Markovich 1553 70

ELECTRONICS AND RADIO ENGINEERING

Prospects for Unification of Analog–Digital Converters of Hodoscopic Registration Systems — S. G. Basiladze and L. Lokhonyai 1555 72

High-Speed Synchronous Detector Using an Integrator with Memory Inverse Feedback — I. L. Zaitsevskii and V. I. Turchanikov 1563 79
Λ-Diode Q-Multiplier — V. I. Baryshev and A. A. Kuznetsov 1567 83
Precision Voltage—Frequency Converter — A. S. Martynyuk 1569 84
Device for Voltage Measurement over a Wide Frequency Range by the Contactless Method — Yu. A. Bystrov, E. N. Zagranichnyi, and Yu. F. Radchenko 1572 87
Integrator System for Averaging Digital Voltmeter Indications — V. V. Petrov and A. A. Zagrubskii 1574 89
Wideband Amplifier Modules Using KT934B, V Transistors — B. I. Ivlev 1576 91
Source Follower with Transistor Gate Protection Circuit — A. N. Mashlykin 1578 93
Low-Noise Temperature-Stable Preamplifier — V. P. Korotkov, M. V. Sosnenko, and N. A. Khrebtov 1580 95
Infralow-Frequency Sine-Wave Generator Using Discrete Components — V. N. Salosin, É. I. Lezhnev, and Yu. V. Koshevoi 1582 97

Volume 22, Number 6, Part 2 November-December, 1979

ELECTRONICS AND RADIO ENGINEERING

Pulse Generator Based on a Lambda Transistor — V. P. D'yakonov and O. V. Semenova. 1587 100
Generator of High-Voltage Rectangular Pulses — M. U. Bulatov, B. K. Toropov, V. G. Filippov, and E. N. Chernov. 1589 101
High-Frequency Transistorized Generator of Short Pulses — V. G. Pikulik and A. E. Piskunov. 1591 103
High-Voltage Pulse Operation of Film Cold Cathodes — B. V. Bondarenko, N. A. Dyuzhev, V. I. Makhov, E. N. Danil'tsev, G. M. Kukavadze, and V. I. Pershin 1593 105
Controlled Voltage Ratio Meter — V. V. Tekin 1596 108
Device for Rapid Scanning of Magnetic Field of EPR Spectrometer — V. I. Aleksandrovskii, V. N. Linev, and V. V. Lisovskii 1598 110
Instrument for Measuring Amplitude—Frequency Characteristics in the Millimeter Band — A. N. Kozyr'kov, A. D. Oleinikov, and V. V. Pershakov 1601 113
Method of Increasing the Noise Immunity of a Microwave Radiometer — V. I. Danilov and Yu. I. Modeev 1604 115
High-Speed Protection in dc Power Circuits — V. D. Shishulin, V. A. Slobodyanyuk, A. I. Abramov, and A. P. Gnedov 1606 118

GENERAL EXPERIMENTAL TECHNIQUES

Use of Ion-Current Modulation in Analytical Mass Spectrometry — G. V. Karachevtsev and A. Z. Marutkin 1608 119
Thyristor Schemes for Controlling a Superopticon in the Slave Mode — V. A. Poltoratskii. 1611 121
Differential Photoelectronic Spectrometer with a Retarding Grid — A. V. Golovin, M. E. Akopyan, F. I. Vilesov, and Yu. L. Sergeev . . . 1613 123
Chamber for Investigating the Reflection and Scattering of X-Rays in the Ultrasoft Region — I. A. Brytov, A. Ya. Grudskii, E. A. Obolenskii, and A. F. Panov 1615 125
Calibrating the Chamber of an X-Ray Diffractometer for Temperature — Yu. I. Vesnin and S. P. Zakovryashin 1618 128
Service Life of Vacuum Frequency Switching Elements — I. A. Voronezhskaya, L. N. Kosmarskii, L. G. Sinel'nikova, and L. S. Éig 1620 129
Differential Frequency Gravimeter — A. G. Smagin and V. S. Teren'ko. 1623 132
Highly Sensitive Accelerometer for Measuring the Vibrations of Experimental Equipment — G. A. Mikhailov. 1626 134
Method for Achieving Large Monoaxial Dilations of Single Crystals — N. B. Brandt, V. A. Kul'bachinskii, N. Ya. Minina, and V. D. Shirokikh 1630 137
High-Voltage Power Unit for an Autoionization Microscope — N. V. Nikonenkov. 1634 140

Determination of Strain Amplitudes in an Ultrasonic Wave at Helium Temperatures — L. N. Pal'-Val', P. P. Pal'-Val', and V. Ya. Platkov 1636 142

LABORATORY TECHNIQUES

Automatic Viscosimeter for Investigation of Melts — V. P. Zhereb, Yu. F. Kargin, and V. M. Skorikov 1640 145

Projection Device for Obtaining Submicron Film Elements — V. I. Zakharov, D. P. Kolesnikov, and A. V. Nikitin 1642 146

Programming Equipment for a Thermoregulator — V. A. Gavrish, L. F. Il'icheva, M. A. Karavanova, A. V. Radkevich, and P. E. Stadnik 1645 149

Transistor Differential Temperature Transducer — V. E. Remorov and V. A. Putintsev 1647 150

Thermal Transducer Based on Resistive Alloy Ni + Mn — V. A. Cherenkov, I. L. Rogel'berg, and V. M. Beilin. 1649 153

Detector for Measuring Local Heat Fluxes by the Thin-Disk Method — Yu. F. Gortyshov, I. M. Varfolomeev, V. K. Shchukin, and L. Ya. Volkov 1651 154

Efficient Miniature Decimeter-Band Phase Shifter — S. V. Karmazin and B. I. Smiyan. 1652 155

Measurement of the Coefficient of Thermal Inertia of Thermocouples under Operating Conditions — V. G. Zubov, N. G. Koval'chuk, I. D. Pytel', and K. S. Semenistyi. 1654 156

Thin-Film Temperature Detector Based on Nickel Dimethylglyoximate — S. V. Bulyarskii, N. F. Burbulya, G. N. Golban, and I. D. Samus'. . . 1656 158

Optical Cryostat for Studies at Temperatures Down to 0.5°K — L. P. Mezhov-Deglin, V. I. Revenko, and A. F. Dite. 1658 160

NEW INSTRUMENTS

The UPI Device for Registration of Measurement Data by a Magnetic Storage Tape for the ES Computer — V. N. Vasil'ev, Yu. M. Zhabyko, Yu. A. Korobov, Yu. F. Popelenskii, G. M. Solodikhin, and V. A. Solodovnikov. 1662 164

The UVI Device for Processing and Input of Experimental Data into Third-Generation Computers — V. N. Vasil'ev, V. P. Dudalev, V. A. Ivanov, G. M. Solodikhin, and V. A. Solodovnikov. 1663 165

Contactless Instrument for Measuring Moment of Force — Yu. I. Sulimov and Yu. G. Litvinov 1664 166

Two-Stage Microcooler for Small Rates of Heat Flow — L. I. Anatychuk, A. P. Mel'nik, and P. D. Mikityuk 1665 167

Two-Channel Angle-Code Convertor — Ya. V. Buchinskii, P. M. Marchenko, S. A. Piskun, A. A. Stolyarov, L. A. Uzlova, and Yu. V. Shatskikh . . . 1666 168

Nanosecond Pulse Generators — K. E. Bernotas and V. I. Vinogradov. 1667 169

Quartz Acoustooptical Filter — F. L. Vizen, V. M. Zakharov, Yu. K. Kalinnikov, Z. A. Magomedov, V. N. Maslennikov, and V. I. Pustovoit 1668 170

Automatic Recorder for Magnetization Steps in Ferromagnetics — V. A. Shakhnin. 1669 171

Instrument for Measuring Inhomogeneity of a Magnetic Field — Yu. A. Bystrov, E. N. Zagranichnyi, and Yu. F. Radchenko. 1670 172

Device for Measuring Thermodynamic Parameters of Liquids — Yu. D. Khayutin 1671 173

The IOG-1 Eyepiece Measuring Head — V. K. Aleksandrov and V. P. Loshak. 1672 174

Instrument for Automatic Detection of Radionuclides Emerging from a Timed-Droplet Column — V. A. Dem'yanov, A. M. Épshtein, and A. I. Ketov 1673 175

Apparatus for Measuring the Spectral Density of the Frequency Fluctuations in a Precision Oscillator — Yu. A. Asmolovskii, V. L. Mukhin, V. V. Tokarev, and V. Sh. Yakhin. 1674 176

Multichannel System for Examining Voltage-Pulse Shapes — G. G. Bondarovich, N. A. Sokolova, V. G. Tsyvinskii, and V. A. Oleshchuk 1675 177

Device for Measuring Parameters of Random Processes — V. A. Vasil'ev and I. B. Mariengof 1676 178
Multiparameter Measuring Device Using a Self-Excited Oscillator — É. I. Arsh, A. K. Florov, A. G. Leizerovich, N. I. Tverdostup, and V. S. Khandetskii 1677 179
Counting Timer — D. V. Kryzhanovskii and A. L. Kosmovich 1678 180
Phase Calibrator — S. S. Kuznetskii, N. M. Kurochkina, and L. E. Bykova. . . 1679 181
Charge-Sensitive Recorder — A. I. Antonevich, V. V. Butskii, S. S. Vetokhin, and A. M. Sarzhevskii. 1680 181
An ESR Spectrometer with a Gunn Diode uhf Source — A. M. Belonogov, Yu. V. Bogachev, D. P. Volnyagin, V. Z. Drapkin, V. V. Zayats, Yu. A. Makarov, R. S. Maron, and A. S. Serdyuk 1681 182
Digital Store for ESR Spectra — S. S. Katushonok, M. V. Komar, V. V. Kudalenkin, S. G. Onishchuk, L. I. Shestakova, and S. S. Shushkevich. 1682 183
Stabilized Cryogenic uhf Oscillator — V. D. Bobryshev, V. M. Dmitriev, V. I. Kizilov, N. N. Prentslau, and V. A. Yatsenko 1683 184
The LG-75-1 Helium-Neon Laser — V. L. Koltun, M. V. Kravets, and A. I. Senyukov 1684 185
The G77 Milliteslameter — V. V. Korsakov, N. M. Semenov, S. A. Skorodumov, V. N. Spiridonov, and A. I. Fedorov. 1685 186
Instrument for Rapid Measurement of Concentration of Charge Carriers in Semiconductors — A. A. Zakharov, V. B. Ermilov, V. V. Kazantsev, and M. Z. Ryzhii. 1686 187
Four-Channel "Lenta" Digital Device for Vibrational Measurements — V. G. Grinev, V. I. Kurepin, and L. V. Grineva 1687 188
Magnetic Suspension Arrangement for Ferromagnetic Rotors — I. A. Maleev, V. M. Ponizovskii, and E. A. Kurdyumov 1688 189
An RC Oscillator for Gas Thermal Conductivity Measurement — S. F. Borisov, Yu. G. Semenov, and P. E. Suetin. 1689 190
Small-Inertia High-Temperature Thermometer with Increased Convergence of Readings — I. P. Kuritnyk, B. I. Stadnyk, V. I. Lakh, L. V. Bachmaga, and Ya. V. Sanotskii 1690 191
